

BatchOutput for Microsoft Word Adds New Options To Manage Duplicate PDFs

Published on 04/21/17

Zevrix Solutions today announces BatchOutput DOC 2.5, a feature update to its output automation solution for Microsoft Word. BatchOutput automates printing and exporting of multiple documents to PDF, and allows to carry out professional PDF production directly from Word. It offers batch processing, image compression, PDF security, variable file names and other options. The new version gives users an option to overwrite duplicate PDF files or assign unique names to preserve existing documents.

Toronto (ON) Canada - Zevrix Solutions today is proud to announce the release of BatchOutput DOC 2.5, a feature update to its output automation solution for Microsoft Word on macOS. The software provides advanced solutions for demanding enterprise and office publishing environments through automation of printing and professional PDF output. For example, users can leave BatchOutput to export hundreds of Word files overnight, and then pick up the completed job next morning.

The new version introduces an option to automatically overwrite output PDF files with identical names. If users uncheck this option, BatchOutput DOC will append a number to the file name in order to preserve existing PDF documents. The update also addresses some display redraw issues on macOS Sierra, improves memory management, and fixes a crash that could occur when splitting Word documents into single-page PDF files.

With BatchOutput DOC, users only need to select the Word files they wish to output and choose the processing options. The software will do the rest automatically saving the time and hassle of opening and exporting each file by hand. BatchOutput DOC is the only app on the market that gives Office users direct access to advanced PDF creation options:

- * Print and export multiple Word documents to PDF with a single click
- * Split Word files into single-page PDFs
- * Variable output file names
- * Reduce PDF file size and optimize documents for web, print and mobile devices
- * Encrypt and password-protect PDF documents
- * Change PDF color tone, brightness and other qualities

BatchOutput DOC is a part of the Zevrix BatchOutput family of products which also includes output automation solutions for Microsoft Excel, PowerPoint, Adobe InDesign and PDF workflows.

Pricing and Availability:

BatchOutput DOC can be purchased for \$39.95 (USD) from the Zevrix Solutions website as well as from authorized resellers and Mac App Store. Trial is also available for download. The update is free for users of version 2 and \$20 from version 1. BatchOutput DOC requires Mac OS X 10.6-10.12 and Microsoft Word 2008, 2011 or 2016.
