

Smart Finance App is the Comprehensive Personal Finance App for iOS

Published on 04/25/17

Moscow-based indie developer, Alexander Survillo today announces Smart Finance: Personal Finance, Budget & Money 1.1.4, an important update to his popular personal financial planning and management app for iOS devices. Users simply enter their income and estimated expenses, and the app immediately helps define their current financial state. The comprehensive app also offers users reminders about important upcoming payments. Version 1.1.4 brings performance improvements to the app.

Moscow, Russia - Independent developer, Alexander Survillo today is proud to announce the release and immediate availability of Smart Finance: Personal Finance, Budget & Money 1.1.4, an update to his comprehensive personal financial planning app for iPhone, iPad, and iPod touch devices. Smart Finance offers users the ability to establish and manage a financial plan, compare income and expenses, and forecast cash flow.

By making use of Smart Finance's built-in tools, anyone can actualize their financial plan in just a short period of time. The app allows users to establish a financial plan without the requirement of entering every payment. The app's cash flow forecasting tool offers users the ability to determine which portion of their funds they can use for savings, investments, and purchases.

"Most financial planning apps require tedious expenditure entries, down to the last penny. Smart Finance allows users to actualize their plans by entering their income and the estimated amount of their expenses," says app developer Alexander Survillo. "The app instantly estimates how much money will be available each month, helping to simplify financial planning."

Smart Finance allows anyone to:

- * Quickly prepare a finance plan and define the current condition of their finances
- * Compare income and expenses
- * Analyze expenses structure
- * Determine availability of funds for possible investments or purchases
- * Calculate loan payment schedules, including possible prepayments
- * Easily actualize any financial plan

Smart Finance offers users informative charts and diagrams which help to visualize the comparison between income and expenses, aid in analyzing expenses structures, and forecast cash flow. Integrated loan and deposit calculators offer the user a great way to plan loan prepayments, instantly learning how such prepayments might affect cash flow.

Users can also set important payment reminders from within the app, ensuring they'll never forget a payment again. The app supports multiple currencies, making it perfect for use with any monetary system. Smart Finance automatically makes conversions to the user's main currency for quick and easy charting and analysis.

All information entered into Smart Finance is stored solely on the device, and is never transferred to the cloud, or synchronized with other devices, making sure your financial information is kept safe. Plus, users can protect their information via a secure passcode, or they can lock it down with a fingerprint via Touch ID on compatible devices.

Smart Finance allows anyone to make use of its comprehensive, yet easy-to-use financial tools to create a sound financial plan. The app offers a low learning curve, and the flexibility to work with any currency, making it a true international currency solution for iOS device users everywhere.
