

Backtrack Golf released for iOS - Take A Look Back

Published on 06/21/17

Honolulu based indie developer, Aron Nelson today introduces Backtrack Golf 1.1, a new sports app developed exclusively for iPhone. Backtrack golf allows you to follow your child as they play on the golf course with your iPhone and more. In addition to showing your child's location, it also marks places where they stop and hit and shows the yardage between marked spots. It's also an awesome way to remember all the good rounds you have played and a great way to analyze how you are playing.

Honolulu, Hawaii - Independent developer, Aron Nelson today is pleased to announce the release of Backtrack Golf 1.1, a new sports app developed exclusively for iPhone. Backtrack golf allows you to follow your child as they play on the golf course with your iPhone and more. In addition to showing your child's location, it also marks places where they stop and hit and shows the yardage between marked spots.

No more guessing where your child is on the course. You can get an idea of how they are playing based on where they went and the marked yardages. Imagine following your child as they play in college, or during tournaments on your iPhone. In addition to remote viewing, Backtrack golf is an excellent companion for you, the golfer. It logs where you went on the course and marks positions for you in the background while you play. If you have an Apple watch, there are more options when notifications happen - like adding a comment to a marker (i.e. "Driver").

"It's incredible to see just how far you hit a club. Real yardages, not guessing," explained Aron Nelson, developed of Backtrack Golf. "It's great for when you play in the wind. You can really see how much the wind affects your ball. With the Apple watch, you get a vibration when it has marked your location. You can use this to remind yourself not to rush. Do your pre-shot routine, calm down and play good! Once you are done with your round, you can look back and see where you traveled on the golf course. It's like a visual scorecard!"

Once you play with Backtrack Golf, you will want to use it all the time. It's an awesome way to remember all the good rounds you have played and a great way to analyze how you are playing. Take a look back!

Device Requirements:

- * iPhone, iPad, and iPod touch
- * Supports Apple Watch
- * Requires iOS 10.2 or later
- * 5.3 MB
