

## LinkOptimizer for Adobe InDesign Now Can Open Images, Reveal in Finder

Published on 06/30/17

Zevrix Solutions announces LinkOptimizer 5.1, a feature update to company's workflow automation solution for Adobe InDesign. LinkOptimizer allows to speed up processing and reduce the size of InDesign links by eliminating excess image data. The software can also perform image adjustments, convert file formats and help repurpose InDesign documents for web and mobile devices. The new version lets users open images with an app of user's choice and reveal them in Finder directly from LinkOptimizer.

Toronto (ON) Canada - Zevrix Solutions today announces LinkOptimizer 5.1, a feature update to its workflow automation solution for Adobe InDesign. Awarded 4 out of 5 stars by Computer Arts magazine, LinkOptimizer automates complex image manipulation tasks helping users reduce the size of InDesign links, save processing time, and repurpose InDesign documents for web and mobile devices..

The new version lets users open selected images with an editor app of their choice directly from LinkOptimizer via the new contextual menu. An option to open InDesign links with the default program assigned by macOS is also available. The contextual menu also allows users to reveal the selected files in the Finder, eliminating the need to do it manually or perform this task from InDesign.

"Today LinkOptimizer batched a huge book project and another magazine project in minutes vs. hours. Now I can take the afternoon off and drink beer," says Brian Donahue, owner of bedesign studio in Minneapolis, Minnesota. "Thanks for freeing up my afternoon, rather than doing production work."

LinkOptimizer works automatically with Photoshop to eliminate the excess image data of InDesign links, perform essential image adjustments and convert image formats. For example, with just a click of a button users can:

- \* Optimize dozens of InDesign documents
- \* Scale and crop images to match their dimensions in InDesign
- \* Change their resolution to 300 dpi
- \* Convert RGB images to CMYK
- \* Resave JPEG files as TIFF
- \* Run a Photoshop action on each image.

As a result users can save gigabytes of disk space and countless hours of optimizing images manually, accelerate document output, reduce job turnaround and cut costs through faster processing.

### Pricing and Availability:

LinkOptimizer can be purchased from Zevrix website for \$259.95 USD (Light version: \$179.95) as well as from Adobe Exchange and authorized resellers. Trial is also available for download. The update is free for LinkOptimizer 5.x users and \$130 to upgrade from previous versions. LinkOptimizer requires Mac OS X 10.7-10.12 and Adobe InDesign / Photoshop CS5-CC 2017.
