

QuickerTek announces External Battery for USB Type-C 2015-2017 MacBook

Published on 09/25/17

QuickerTek today announces their USB-C MacBook External Battery. Created with Lithium-ion power cells for the highest charge density possible, the all-new USB-C MacBook External Battery is the only product of its kind; featuring the USB 3.1 adapter cable necessary to power and charge the 2015-2017 MacBook and MacBook Pro 13" and 15." Users of these newest model MacBooks can now travel freely and charge their computer anywhere, not just where there is a power outlet.

Wichita, Kansas - QuickerTek, a technology leader in mobile power and wireless networking products for Apple computers, is proud to announce the USB Type-C Most Versatile eyeBattery. This battery is the only product of its kind, featuring the USB 3.1 adapter cable necessary to power and charge the 2015-2017 MacBook and MacBook Pro 13" and 15". Users of these newest model MacBooks can now travel freely and charge their computer anywhere, not just where there is a power outlet.

This battery has been especially designed to provide a portable power source for MacBooks with USB-C 3.1 ports. It is created with Lithium-ion power cells for the highest charge density possible, adding up to 18 hours in extra run time for the USB-C MacBook and 16 hours for the 15" USB-C MacBook Pro. For even more productivity, the Most Versatile eyeBattery also charges and powers the MacBook simultaneously. It is ideal for extended travel as well as outdoor time.

Every battery is shipped with a 120/240 Vac external smart battery recharger and USB-C (3.1) adapter cable, for immediate use. No drivers and no extra cables are needed. It is no longer necessary for users to carry an Apple recharger either. This battery also includes a USB type 2/3 charging 5.1 VDC at 2A for most USB devices such as iPhones and iPads.

The total recharge time for this battery is two hours. Smart circuitry in the battery prevents overcharging and overheating. The anodized, machined aluminum case features a 10-LED power gauge to show percentage charge levels of the external battery. Each battery is tested before shipment by running movies on a MacBook continuously.

Specifications:

- * Dimensions: 6.125" x 8.25" x .875"
- * Weight: 2.2 lb.
- * Chassis: anodized machined aluminum

Pricing and Availability:

The USB-C MacBook External Battery is only \$399 (USD). This battery is also compatible with QuickerTek's USB Type-C Solar Panel Chargers. For more information, please contact Rick Estes.
