

Vito Technology introduces Satellite Tracker 1.0 for iOS/Android

Published on 09/29/17

Virginia based Vito Technology today introduces Satellite Tracker 1.0, the company's new reference app for iOS and Android devices. With Satellite Tracker one can easily find out where satellites can be seen from different locations in the world, as well as get predictions for the passes. Featuring stunning visuals, attractive and an easy-to-use interface, Satellite Tracker was developed specifically for easy and comfortable real-time satellite tracking.

Alexandria, Virginia - Vito Technology, the award-winning developers of the famous astronomical app Star Walk, and winner of the Apple Design Award 2010, today is pleased to announce the release of Satellite Tracker 1.0, the company's new reference app for iOS and Android devices. With Satellite Tracker one can easily find out where satellites can be seen from different locations in the world, as well as get predictions for the passes. This app was made specifically for easy and comfortable real-time satellite tracking. This new Satellite Tracker app stands out among other satellite applications with its stunning visuals, attractive and easy-to-use interface.

Main features:

- * Simple satellite tracker in real time
- * The most outstanding satellites with interesting facts
- * Satellite flyby timer
- * Pass predictions
- * Hand-picked passes
- * Location choice
- * Satellites view in real time in the sky
- * Fly-with-satellite view
- * Satellite orbit over the Earth

"This app was inspired by our bestsellers that include dozens of features, some of which are hidden, explained Murad Nazaraliev, Managing Director. "One of the feature is a big catalogue of satellites. We wanted to highlight satellites flybys, let people learn at-a-glance where the satellite is flying at each moment of time, as well as allow everyone to see the beautiful creations that make a great job out there for us investigating our planet and making astronomy discoveries."

Language Support:

Satellite Tracker supports US English, Russian, Chinese Simple (HANS), German, Italian, Japanese, French, Spanish, Korean, Chinese Traditional languages.

Device Requirements:

- * iPhone, iPod touch, iPad, Android devices
- * Requires iOS or Android

Pricing and Availability:

Satellite Tracker 1.0 is free (with In-App subscription), and available worldwide through App Store and Google Play in the Reference category. Review copies are available upon request.
