

## **CAZE announces New ThinEdge bumper case for iPhone X**

Published on 10/31/17

A leader in ultra thin case design, CAZE announces its new ThinEdge bumper for iPhone X, one of the world's slimmest frame case, measuring just 1mm. Constructed of lightweight and ultra-efficient impact absorbing material, ThinEdge is a unique and stylish bumper composed of two parts: a flexible frame and a fastener. It offers tough protection for your iPhone, while preserving its natural beauty. CAZE offers three different fasteners in this new version for dressing up your new iPhone.

Hong Kong - CAZE, the leader in ultra thin Snap-On Case and bumper, has announced its new ThinEdge bumper for iPhone X, one of the world's slimmest frame case, measuring just 1mm. ThinEdge is a unique and stylish bumper composed of two parts: a flexible frame and a fastener. It offers tough protection for your iPhone, while preserving its natural beauty. CAZE offers three different fasteners in this new version for dressing up your new iPhone.

Constructed of lightweight and ultra-efficient impact absorbing material, ThinEdge frame case offers sleek and stylish protection for the iPhone X and comes with three different colored fasteners for you to personalize your new iPhone. Even better? It's only 1mm thick. As it's ultra thin and lightweight, you can barely notice the change of the thickness and weight after putting on such as a slim case on your iPhone.

ThinEdge is available in two editions: (1) Matte and (2) Clear. ThinEdge matte features a smooth silk finish that gives a soft hand feel while enhancing grip. ThinEdge Clear is an ideal for iPhone lovers to show off the design of the iPhone sleek profile and beauty finish of Apple's design.

To maintain the balance between case-minimalism and protection, CAZE used one of the strongest materials TR-90 and applied an ultra-efficient impact absorbing technology to make the case so thin and tough. It fits tightly around the edges of the iPhone and the corners are reinforced to bear the brunt of any impact and the front and back have raised edges to protect the screen and back glass. The result leaves the back and front of the iPhone X fully exposed visually, but shielded against scratches and the rear camera(s) would not be in touch with the flat surface.

ThinEdge is lightweight, tough, flexible, shatterproof and resistant to UV damage. Each frame case comes with three different colored fasteners for personalizing the iPhone X.

ThinEdge is easy to install. Its anti-slip property gives the iPhone more grip on surfaces. Easy access to all phone functions without having to remove the case. Open access to your Lightning connector makes charging easy. And not only is it designed to work perfectly with iPhone Lightning Dock, but it's also designed to work perfectly with CAZE screen protectors (come with the case).

If you can't bear to cover your iPhone X up, then a bumper might be the right choice for you. Colors obtainable for now are Black, Silver and Clear. Aside from the ultra slim bumper, you will get a front tempered glass screen protector, a back glass protection film and a microfiber cloth.

iPhone CAZE started its business at a small shop with handmade products at the beginning and proudly released its first iPhone case in 2007. Due to the spread of word and increasing demand of overseas orders, iPhone CAZE began to take orders on its website in 2009. iPhone CAZE admires fashion, using leather, fabric, metal, polymer and swarovski crystal, to bring something luxury and special on iPhone for any occasion.
