

## **Ukulele Tuner Pro Lite - Tune with precision and ease, for free**

Published on 10/31/17

Daikyouju Labs today releases Ukulele Tuner Pro Lite 1.0, an innovative music app for iOS. Perfect for professional musicians and ukulele lovers alike, Ukulele Tuner Pro Lite combines speed with precision, design and an intuitive, easy to use interface. The app indicates the sound frequency in Hertz (Hz) in order to achieve the exact note depending on the type of ukulele (soprano, concert, tenor or baritone). The musician just needs to play the string and a light comes on when it is in tune.

Lima, Peru - Daikyouju Labs today is pleased to announce the release of Ukulele Tuner Pro Lite 1.0 for iOS, an innovative app that combines speed - thanks to its high responsiveness - with precision, design and an intuitive interface that makes it easy to use. A great app for professional musicians and ukulele lovers.

Ukulele Tuner Pro Lite is the free version of our Ukulele Tuner Pro app, optimized for 64-bit, which indicates the sound frequency in Hertz (Hz) in order to achieve the exact note depending on the type of ukulele (soprano, concert, tenor or baritone). The musician just needs to play the string and a light comes on when it is in tune.

Main features and tools:

- \* Made for Soprano, Tenor and Concert Ukuleles
- \* Display the exact sound frequency value in Hz
- \* Visual and audible tuning indicators
- \* Highly responsive
- \* Universal app.

Thanks to its minimalist design, Ukulele Tuner Pro Lite loads instantly and the musician, student or amateur will be able to save time to devote to practicing or playing his/her instrument. Ukulele Tuner Pro users around the world have recommended this app for its fast performance, intuitive interface and sound precision.
