For most vendors, Black Friday have long been a time to rake in revenue. They rely heavily on gimmicks to drum up publicity. MacX DVD, however, has always set "High Quality" as one of its primary goals, despite a steady uptick in sales over the years. The "High Quality", on the one hand, refers to gimmick-free offer, immediate delivery, lifetime free upgrade service and 30-day money back, while it, on the other hand, involves in the gifts it is giving are truly needed for customers.

"We believe in the importance of family and friends and creating meaningful memories," Jack said in a statement that's full of customer-focused ideas for Black Friday campaign, "Our gift is given just in time to help our customers preserve the memories and set together with their families to enjoy movies, right from the comforts of the couch." The black Friday gift, officially named MacX Media Management Suite is cost-effective and content rich, a mashup of 3 programs, inclusive of:

MacX DVD Ripper Pro: DVDs generally come with copy protections; this is a particularly thorny obstacle for general DVD rippers to overcome. MacX DVD Ripper Pro supports both classic and new DVDs (incl. 99-title DVDs, Workout DVDs and damaged DVDs) and successfully rips DVD to MP4, MOV, MKV, AVI, WMV, etc with fast speed and high quality. The surefire DVD ripping performance can be put down to the heavyweight enhancements these years, covering rebuilt title check mechanism, unique hardware acceleration tech, and so on.

MacX Video Converter Pro: Lengthy transcoding are some of the factors that dampen customers' confidence in converting videos. Making matters worse is the fact that the output video is blurry. MacX Video Converter Pro in the latest v6.2.0 successfully converts SD/HD/4K UHD videos in any format, e.g. MP4, MKV, MP4, AVI, WMV, HEVC/H.265, H.264, MPEG4, MTS, AVCHD, etc for playback on phones, tablets, TVs, game consoles, etc at fast speed.

The Auto Copy mode ensures to reformat the video and backup original content 10x faster than before, without affecting the image quality. Besides extending profiles for iPhone X/8 (Plus), it supports 2K/4K video converting, upscaling and downscaling, without manually adjusting the parameters.
