

## Meet PinDrive - an iOS app for car owners made by Eltima with ARKit

Published on 11/23/17

The new app PinDrive with augmented reality was released by Eltima Software today. It is designed for drivers to help them easily find their vehicles in parking lots. The app uses geolocation data on your iOS device to remember where you left your car. Just mark the parking location to later find the car with the help of AR pointer on the screen. PinDrive is currently the first ARKit application presented by Eltima and is the latest software solution by this developer.

Frankfurt, Germany - Eltima Software today is proud to announce the release and immediate availability of PinDrive 1.0, its latest app for iOS devices made with ARKit. PinDrive is a useful pocket helper for drivers that everyone will find rather handy when trying to find their vehicle among a huge number of parked cars: in a parking space near a shopping center, business center or sports arena. With PinDrive you will get to your transport fast and easily. Let's take a closer look at how it works:

Pin a place to find a vehicle:

Once you found a parking space launch PinDrive, pin the position and tap Save. The app will memorize the parked place allowing you to gather your wits and save your time on car search in the future.

Launch the app and find the parked car:

With this online car finder you can seamlessly locate your car. Just open the app, On the screen of your device, you will see the car icon indicating the direction where you should go. Then simply point the camera of your device in this direction and the floating AR arrow will show you the exact location. Knowing the parking location you can find the easiest and fastest way to reach your car.

Device Requirements:

- \* iPhone 6s and newer
- \* Requires iOS 11.0 or later.
- \* 64.1 MB

Pricing and Availability:

PinDrive 1.0 is Free and available worldwide exclusively through the App Store in the Utilities category. For more information, please contact Alex Campbell.
