

SlideFlow - Animated Photo Slideshow on TV Screen

Published on 12/04/17

VeprIT announces SlideFlow, a Mac app for generating animated photo slideshows with background music and playing it on a TV screen. SlideFlow offers the most natural viewing experience, presenting the full photograph, and then applying Ken Burns effect to zoom on human faces. The user can export the slideshow as a video file, or play it immediately on a connected TV. SlideFlow works over Wi-Fi network with many modern smart TVs and other DLNA devices.

Zoetermeer, Netherlands - VeprIT today is pleased to announce the release and immediate availability of SlideFlow, a new macOS app for generating animated photo slideshows with background music, and playing it on a TV screen. SlideFlow offers the most natural viewing experience, presenting the full photograph, and then applying Ken Burns effect to zoom on human faces. The user can export the generated slideshow as a video file, or play it immediately on a connected TV.

"I believe this is simply the best way to present photos." explains Dr. Demid Borodin, VeprIT owner. "And it is remarkably easy to use: just drop some photos to SlideFlow and click Play! Enjoy a beautiful slideshow on a large TV screen together with family and friends!"

SlideFlow works over a local Wi-Fi network with many modern smart TVs, such as Samsung, LG, and Sony TVs. It is also expected to work with other DLNA devices. Support for Google Cast (Chromecast) is coming in future versions, as well as an iOS version.

Device Requirements:

- * 64-bit Mac computer
- * macOS 10.12 Sierra or later (will soon be also compatible with macOS 10.11 El Capitan)
- * 20.8 MB disk space

Pricing and Availability:

SlideFlow 1.0.1 is Free (with in-app purchases) on the Mac App Store, available worldwide in the Photography category. A promotional watermark is added to the generated slideshow, it can be removed with the \$2.99 (USD) in-app purchase. For more information, please contact Demid Borodin.
