

CREATEit 2.5 - An iPad Solution for Students learning at Different Rates

Published on 12/18/17

NeoNet Corp today announces CREATEit and CREATEit Pro 2.5. CREATEit makes it easy to design compelling visuals that you can share with your friends. This includes video, image, audio, PDF, maps, slides, items and WebSonar Library links. Educators can now create Slide Decks that include audio tracks and resource links that can be hosted in our new Presentation Library for distribution to their audience. Students can use the free CREATEit app to download and view these lessons at their own pace.

Salmon Arm, British Columbia - NeoNet Corp today introduces CREATEit and CREATEit Pro 2.5.

Educators can now create Slide Decks that include audio tracks and resource links that can be hosted in our new Presentation Library for distribution to their audience. Students can use the free CREATEit app to download and view these lessons at their own pace.

CREATEit Pro provides everything you need to distribute instructional material that your audience can absorb at their own pace.

CREATEit Pro is designed, specifically for the iPad, to provide the user with an intuitive and versatile tool set to easily present new ideas to an audience visually. You can simply add captions and graphic items to your photos for sharing or, AirPlay to an AppleTV, to dynamically present your stories in a very unique and compelling way.

CREATEit Pro provides the means to view, create, store, share and acquire content. This includes video, image, audio, PDF, maps, slides, and items. Groups of Items and Slide Decks can be exported and uploaded to a Distribution Library where they can be imported by any other CREATEit app client that has access to the library.

Think of it as HyperCard for the iPad. CREATEit Pro combines features from PowerPoint, PhotoShop, and Director and uses a simple flash card metaphor to provide you with a new creative tool and a new platform to share your ideas and wisdom.

- * Graphic Layout Made Easy

- * Display Your Presentations on Apple TV

Spark Your Imagination!
First dream it then CREATEit.

CREATEit provides four overlapping layers that can be used for your presentation. The bottom layer is where the background scene is placed. This image can be loaded from a file or can be created ad hoc with your iPad camera.

The second layer can be used to apply paint to the background. The third layer or stage is where the cast members are placed over the background scene and paint. These items can be

prMac: Publish Once, Broadcast the World :: <http://prmac.com>

moved, rotated and resized at any time. Items on the stage also have properties that can be set, such as: transparency, horizontal orientation, sound control, or deletion. You touch and hold an item to display it's property menu.

The fourth layer or foreground can be used to paint on top of the stage and included items. Paint layers can be edited or deleted without affecting the background scene or included cast members. and cast members can be moved on the stage without affecting the applied paint.

Device Requirements:

- * Compatible with iPad 2 or higher
- * Requires iOS 10.0 or later
- * 275 MB
