

## **CTM releases FoxTrot Professional Search 2.5 and Server for Mac OS X**

Published on 10/28/09

CTM Development today announces FoxTrot Professional Search 2.5, an update to their popular networked document indexing and retrieval solution for Mac OS X. Developed with law firms, media and mobile professionals in mind, FoxTrot Professional Search helps locate documents and their contents using multiple categorization of search results, ranked by relevance. Utilizing the latest Cocoa technologies, the application works directly with PDF, HTML, word processing, e-mail and rich-media metadata.

Geneva, Switzerland - CTM Development today is proud to announce FoxTrot Professional Search 2.5, an update to their popular document indexing and retrieval solution for Mac OS X. Perfect for anyone who works with saved documents for future reference, FoxTrot Professional Search helps locate documents and their contents using multiple categorization of search results, ranked by relevance.

FoxTrot Professional Search is a powerful find-by-content solution that offers precision tools for finding the proverbial "needle in a haystack" directly within PDF, HTML, word processing, e-mail and rich-media content and metadata. The product has been especially well received in legal (law firm and courts), media (newsrooms researchers, ad agencies and editors), mobile contexts (MacBook users with document collections) as well as by casual users stepping up from FoxTrot Personal Search or Apple's Spotlight.

By leveraging and extending Mac OS X's built-in Spotlight capabilities, FoxTrot Professional Search utilizes the latest Snow Leopard technologies, featuring document preview and full view capabilities, with secondary document-level search features. Users can manage multiple indexed collections effortlessly and time search index updates without even launching the application.

### Feature Highlights:

- \* Multiple categories of relevance-ranked results
- \* Document preview and full view, with secondary document-level search
- \* Multiple indexed collections and timed updates without launching the application
- \* Client-server access to peer-to-peer FoxTrot Professional applications and dedicated FoxTrot Search servers
- \* Worldwide Unicode language support

"CTM Development has been creating search and collaboration software since the first multi-platform Swiss telephone directories back in 1987, and search has been an important part of CTM PowerMail since its inception in 1995," said Jean-Michel Karr, co-founder of CTM Development SA. "CTM FoxTrot Professional is the culmination of many years of focus on find-by-content."

FoxTrot Professional Search builds on years of experience in search functionality refined within CTM's PowerMail and FoxTrot Personal Search products, which continue to be enhanced. Version 2.5 introduces higher performance, an expanded timeline categorization as well as networked sharing of indexes:

When customers purchase a 5-user license, the application automatically acts as a peer-to-peer indexing server.

With a 10-user license (or more), customers receive a full fledged client-server product with a server component that can be deployed any Mac OS X or Windows 7/Vista/XP with file sharing enabled, as well as on Xserve and the new Mac mini Server or Windows Server 2003, Windows Server 2008 and Windows Server 2008 R2. This makes FoxTrot Professional Search

prMac: Publish Once, Broadcast the World :: <http://prmac.com>

particularly suited in networked environments where sharing archived documents and metadata is paramount.

Language support:

- \* U.S. English and French

Minimum Requirements:

- \* Mac OS X Version 10.4.11 Tiger or later (Snow Leopard compatible)

- \* Universal Binary for PowerPC and Intel

- \* FoxTrot Professional Search & FoxTrot Search Admin supports Mac OS X or Mac OS X Server

10.4.11, 10.5 or 10.6

- \* FoxTrot Search Server supports Mac OS X or Mac OS X Server 10.4.11, 10.5 or 10.6, and also includes a slightly narrower focus Server component for Windows 7, Windows Vista and Windows XP specialized on PDF, Word and text documents

New License Pricing:

FoxTrot Professional Search 2.5 and FoxTrot Search Server are available immediately. A single user license is priced at only 99 Euro. A 5 user license (includes peer-to-peer sharing) is available for only 199 Euro. A 10 user license also includes FoxTrot Search Server for 390 Euro, with degressive per-seat enterprise licenses available.

Evaluation Versions:

FoxTrot Professional Search 2.5 is available as a full-featured 30-day demo. FoxTrot Search Server is available as a full-featured 90-day demo.

Upgrades:

FoxTrot Professional Search 2.5 is a free update for current FoxTrot Professional Search licensed owners, and is available to current FoxTrot Personal Search users for the difference in price only (69.3 Euro) via a coupon e-mailed to all registered owners.
