

Streets 4.0: Street View App Adds Drag and Drop and Live Panorama Mode

Published on 05/07/18

FutureTap GmbH today releases Streets 4, an update to their street level view browser app for iPhone, iPad & Apple Watch. Anyone can navigate to any 360 degree panorama simply by dropping a pin on the map or by searching for an address or contact. A selection of more than 2000 spectacular locations such as national parks, museums & underwater panoramas are available in a gallery as well. Panorama coverage is visualized with a blue map overlay and favorite panoramas can be organized in folders.

Seefeld, Germany - FutureTap GmbH today is pleased to announce the release of Streets for iOS. Streets is focused on delivering the best Street View browsing experience. The user can navigate to any 360 degree panorama simply by dropping a pin on the map or by searching for an address or contact. A selection of more than 2000 spectacular locations such as national parks, museums, and underwater panoramas are available in a gallery as well. Panorama coverage is visualized with a blue map overlay and favorite panoramas can be organized in folders.

New in Streets 4 on iPad, panorama locations can also be set via drag and drop. The user can drag a pin location from the Maps app, a contact, or a textual address into the Streets app to find nearby panoramas. Even geotagged photos can be dropped in Streets to find 360 spherical images near the photo location.

Street View panoramas and map locations can also be shared with other apps using drag and drop. For instance, the user can attach a Street View panorama of a meeting place to an email or note. Or the user can drag a panorama or map location into the Maps app to get directions.

With the new Live Panorama mode, virtually traveling abroad is even more immersive and fun. Turning around in the panoramic scene works by simply rotating the device. Streets 4 is optimized for iOS 11 and fully supports the iPhone X, in either portrait or landscape orientation.

What's New in Streets 4:

- * Drag and drop support on iPad:
- * Drop a map location, a contact, marked text with an address, or a geotagged photo in Streets to find nearby panoramas
- * Drag the panorama or the map pin into other apps such as Mail, Notes, Contacts, Photos, Maps, and more to share the panorama image or map location
- * Live Panorama mode: look around in a panorama by rotating the device
- * iPhone X support

Language Support:

- * English, German and French

Device Requirements:

- * iPhone, iPad, iPod touch, and Apple Watch
- * Requires iOS 9.3 or later
- * Streets for Apple Watch requires watchOS 2 or later
- * Universal Application
- * 22.3 MB

Pricing and Availability

Streets - Street View Browser (v4.0) costs \$1.99 USD (or an equivalent amount in other currencies) and is available worldwide exclusively through the App Store in the Navigation
