

## SkyVPN Released VPN for Mac with Unlimited Traffic

Published on 05/22/18

California based Sentry Secure Communication releases SkyVPN 1.0.5, a maintenance update to their popular private network application service for macOS. Version 1.0.5 improves the user experience with minor bug fixes. SkyVPN allows you to access all content from your Mac with the fastest and most stable VPN Servers. All your information will stay safe and protected because your data will be encrypted and your online activities will remain completely anonymous.

Los Angeles, California - Sentry Secure Communication is pleased to announce the release of SkyVPN 1.0.5, a maintenance update to their popular private network application service for macOS. SkyVPN is known around the world for effectively bypassing emergent firewall blocks. But up until recently, it was only available on Android and iOS. Now, Mac users can get the same VPN service with the newly-released SkyVPN for Mac.

Have multiple devices on different operating systems? No problem. SkyVPN users can use the same VPN account on any device running iOS, Android, PC or Mac, at the same time. Most importantly, there is no limit on traffic consumption.

What's Special About SkyVPN?

The VPN service market has exploded in the past few years and there are now a large number of VPN apps available. But SkyVPN is special. What makes SkyVPN different from all the other VPN apps?

SkyVPN is the only VPN app that provides free Premium service. At sign-up, users can take advantage of two different kinds of service:

1. Basic Service (free, US server only)
2. Premium Service (unlimited session time, global servers, even faster & more stable connection)

Users can easily earn unlimited premium traffic by spending several minutes watching ads and completing simple tasks. The more ads you watch and the more tasks you complete, the more premium traffic you can earn. You can also earn premium traffic simply by checking in every day. There's no better or easier way to get premium VPN service than with SkyVPN for Mac, PC, Android, and iOS.

Whether you choose Basic Service or Premium Service, SkyVPN has the ability to bypass all kinds of firewall blocks. What's more, the developers of SkyVPN are always working hard to improve their services so that users can maintain their internet freedom. Because of this ongoing commitment to improvement, SkyVPN has earned high praise among all its users.

What Users Say About SkyVPN:

"This VPN is best VPN I've ever seen. It unblocks my school WiFi, allows me to access any website, any app in school any time. And this VPN updates quickly. Sometimes it not working due to school firewall update. But it comes back so soon unlike other VPN, ONCE THE SCHOOL FIREWALL UPDATED, IT GONE FOREVER. I thought that I will never write a review, but SkyVPN changed my mind. Thanks to the development team thanks to the free network view" - by anastatua May 3, 2018

SkyVPN for Mac:

Want to access any website or browser on your Mac? It is easy to connect to the VPN server with the new SkyVPN for Mac. SkyVPN for Mac is powerful, fast, and stable...just like the mobile version. But SkyVPN for Mac has several advantages that other VPN services for Mac do not.

prMac: Publish Once, Broadcast the World :: <http://prmac.com>

#### Across Multiple Devices:

SkyVPN users can log in on Mac with the same account they use on their mobile device. There's no need to create an additional account for your Mac. In fact, one account can be used on 5 devices at the same time. And all 5 devices will share that account's traffic.

#### Unlimited And Even Free:

If users already have a SkyVPN unlimited traffic plan on their mobile device(s), they can enjoy that same unlimited VPN service on their Mac for free. They can surf the internet, watch videos, play games, and much more. All with the confidence that SkyVPN offers the most secure VPN service available.

#### Pricing and Availability:

SkyVPN 1.0.5 is Free and available worldwide exclusively through the Mac App Store in the Productivity category. For more information, please contact Jasper Sun.
