Navicat Announces Partnership With Percona

Published on 06/01/18

PremiumSoft is pleased to announce its partnership with Percona. Percona's industry-leading architecture design consultants have full stack expertise to build databases in hosted and private, public and hybrid cloud environments that are optimized and scale for growth while minimizing application downtime and operational costs.

Hong Kong, Hong Kong - Percona is the only company that delivers enterprise-class support, consulting, managed services and software for MySQL, MariaDB, MongoDB and other open source databases across on-premise and cloud-based platforms.

Percona's industry-leading architecture design consultants have full stack expertise to build databases in hosted and private, public and hybrid cloud environments that are optimized and scale for growth while minimizing application downtime and operational costs.

Percona's managed services team can augment your staff with trusted data advisors to provide project management, best practices for database operations, secure data backups and remote infrastructure management.

With Navicat, you can manage MySQL, MariaDB, SQL Server, Oracle, PostgreSQL and SQLite, or
on-premises databases - Percona Server. It gives you new ways to build, manage, and maintain your databases. Together with Percona, Navicat brings you a high-quality end-to-end database development experience yet.
