

## Popular Image Utility GraphicConverter 10.6.1 Adds New Batch Features

Published on 06/14/18

German indie development team Lemke Software GmbH today announces GraphicConverter 10.6.1, an important update to their award-winning image editing utility for macOS. The app offers users the ability to convert nearly any graphic file format into any of nearly 80 graphic formats. Version 10.6.1 brings many new conversion and modification features, a new graduated filter, and the ability to create many different variants of each processed file in a batch operation.

Peine, Germany - Lemke Software GmbH today is proud to announce the release and immediate availability of GraphicConverter 10.6.1, an important update to their popular image editing utility for macOS. The popular app, known as the "Swiss Army Knife" of image editing applications, allows users to convert any of over 200 graphic file formats into any of almost 80 graphic formats.

GraphicConverter has over 1.5 million loyal users worldwide. Users range from amateur photographers to professional designers. The new version of the app brings the ability to create numerous variants of each file being processed in one batch. Also new in the update is a new graduated filter, and new convert and modify features.

"GraphicConverter is one of the most popular professional programs on the market. Our users are some of the most loyal of any graphics utility on the macOS platform," says Thorsten Lemke, founder of Lemke Software GmbH. "The new features included in version 10.6.1 bring the app to another level, improving an already great application."

The update brings a large number of new features, including the ability to create complex batch actions with multiply save operations, new convert and modify operations, and much more.
