WidsMob today has released a new version of WidsMob ImageConvert, which optimizes image watermark function. It is an All-in-One photo converter for macOS, add text watermark, image watermark, create border for images, rotate and flip pictures, as well as convert photos into different formats. In the update, WidsMob ImageConvert also adds 15 language versions.

Hongkong, China - WidsMob Technology Ltd. (WidsMob) today has released a new version of WidsMob ImageConvert, which optimizes image watermark function. It is an All-in-One photo converter for macOS, adds text watermark, image watermark, create border for images, rotate and flip pictures, as well as convert photos into different formats. In the update, WidsMob ImageConvert also adds 15 language versions, including French, German, Japanese, Traditional Chinese, Arabic, Danish, Greek, Italian, Japanese, Swedish, Portuguese, Russian, Spanish, Swedish, Turkish and more.

Convert RAW in batch. Whether the RAW format, or mixed-format images, you can turn photos into to JPEG, JPEG 2000, PNG, TIFF, BMP, and more. What is more, the advanced algorithm has 6x speed to convert RAW formats into JPEG and other photo formats.

Photo editing features. Resize photos in 4 different modes, By Width, By Height, Percentage and Free, which enlarge small images to desired size. It also rotate videos with different angles in batch, add border or frames in different color mode.

Add watermark. Not only add captions and images as watermark, but also adjust font, style, color, opacity, size, angle, position and more in batch. Just have an instantly preview the applied effects on all the photos to get the optimal result with ease.

Instant preview. When the program applies the photo effects or add watermark, Mac users can have instant preview for the result from the interface for all the image files. It also enables Mac users to click Preview to check the result for each image in detail.

User friendly. Settings to overwrite the files with the original name, switch to turn off and restore to original images in one click. Multiple settings for resize, add watermark and more to get the best result and fast conversion speed.

Highlight features in the latest update:

- * All-round photo converting program with batch process.
- * Convert photo formats, resize photos, add watermark and create border.

Supported file format encryption:

- * WidsMob ImageConvert supports .jpg, .png, .tiff, .erf, .cr2, .nef, .raf, .dcs, .orf, .arw and other 50 RAW formats.

Pricing and Availability:

WidsMob ImageConvert is just \$19.99 USD (or an equivalent amount in other currencies) and is available through the WidsMob website.
