

Spoiler Alert! Food Safety - Labeling and Tracking for the Food Industry

Published on 09/11/18

Ohio based Complete System Solutions, Inc. today announces Spoiler Alert Food Safety 1.5.1, an update to their popular mobile application. Spoiler Alert was specifically designed to change the way the food service industry labels, tracks and monitors the age of food product from fresh to finished. Easily configured for your products, built-in alerts take the guesswork out of what stage your product is in allowing owners and managers to monitor, even over multiple locations.

North Ridgeville, Ohio - Complete System Solutions, Inc. is pleased to announce the release of Spoiler Alert Food Safety 1.5.1, an update to their popular mobile application. Spoiler Alert was specifically designed to change the way the food service industry labels, tracks and monitors the age of food product from fresh to finished. Easily configured for your products, built-in alerts take the guesswork out of what stage your product is in allowing owners and managers to monitor, even over multiple locations.

With this powerful tool you can eliminate waste and maintain compliance with food safety regulations "preventing" Spoiler Alert features a unique label printing system, equipped with eco-friendly "wash-away" labels that adhere to any container, and dissolve completely under running water (in just seconds). Easily print legible labels allowing employees to see at-a-glance: the item, prep date/time and expiration date/time.

QR code scanning tells the system when product is sold or wasted for quick processing. Spoiler Alert is an open system solution that allows for import of product and employee information and export of label activity for long term archive or analysis. With the information provided by Spoiler Alert, owners and managers can make better decisions on product reorder points and prevent waste by acting before product goes out of date.

Easy to setup, easy to integrate and easy to use, this invaluable app and labeling system will more than pay for itself in food cost, time and waste savings. Spoiler Alert! This is the food safety app you've been waiting for.
