

## **Date Virtual Girls in Augmented Reality on your iPhone**

Published on 09/20/18

Nevada based developer, WET Productions Inc. today introduces My Virtual Girlfriend AR, an augmented reality dating simulation game for IOS devices. My Virtual Girlfriend AR features thousands of girls to choose from and date, each with unique personalities and appearances. The goal of the game is to charm your way into the heart of your virtual date and eventually get her to fall in love with you. It combines both humor and light romance for a unique gaming experience.

Las Vegas, Nevada - WET Productions Inc. today is proud to announce the release and immediate availability of My Virtual Girlfriend AR, an augmented reality dating simulation game for IOS devices. My Virtual Girlfriend AR utilizes augmented reality allowing the player to date virtual girls in real life environments, bringing the dating simulation game genre to a whole new level.

Available on iOS devices that support ARkit, My Virtual Girlfriend AR features thousands of girls to choose from and date, each with unique personalities and appearances. The goal of the game is to charm your way into the heart of your virtual date and eventually get her to fall in love with you. It combines both humor and light romance for a unique gaming experience.

"We wanted to bring the My Virtual Girlfriend series to the next level by incorporating Augmented Reality into it, and through the help of our new team member and AR specialist, Kristof Giber, we were able to do just that," said Mike Amerson, President of WET Productions. "Our 'My Virtual' series of dating games have been wildly popular, and having amassed over 10 million downloads over the 8 years it has been available on iPhone. We hope to keep fans of the game happy by bringing them one step closer to reality, through augmented reality."
