

Pterm for Mac 9.1.0 has been released

Published on 09/24/18

California based Wine Reviews today announces Pterm for Mac 9.1.0 for MacOS. Version 9.1.0 is another major release, Pterm is now 64bit macOS Mojave compatible. Pterm and Putty are the Best Terminal Emulators available today. It Supports different types of Network Protocols such as SSH, FTP, SCP, Telnet and more. Official versions of Pterm and Putty are available on Unix-like platforms, and now it's widely available for Mac systems running OSX 10.12.3 or higher.

San Jose, California - Wine Reviews released Pterm for Mac 9.1.0 for MacOS today. Pterm 9.1.0 is another major release. We have fixed a lot of minor bugs and updated Pterm to be 64bit macOS Mojave compatible. Please see the full change-log below for all the exciting changes in this release.

Putty is one of the Best Terminal Emulators available today. It Supports different types of Network Protocols such as SSH, FTP, SCP, Telnet etc. In Windows it is used as SSH Client to connect to Your Linux server or for some other purpose But what will you do if you are on Mac? You might be thinking, Is there any Software like Putty for Mac Available? The answer is Yes! With the help of some other Software's we can Use putty on MacOS although Putty is used widely on Windows Platform. Official Versions of Putty are available on Unix like Platforms, and now it's widely available for Mac systems running OSX 10.12.3 or higher.

SSH is available by default in Mac and Linux or Unix. Although you can use terminal for SSH connections still there are some benefits in using Putty such as Other clients don't keep connections alive whereas Putty does. Also it is cool to use Putty as your SSH client if you are doing some VMware ESXi or CISCO Stuffs, transferring files, managing files on a server or whatever.

Supported Protocols:

- * Telnet
- * FTP
- * SSH
- * SCP

Version 9.1.0 New Features:

- * Now 64bit macOS Mojave compatible
- * A lot of minor bug fixes

Pricing and Availability:

The cost of Putty is only \$15.00 at this time, Pterm 64bit stand alone cost \$19.95 per license. Anyone who has purchased Pterm or Putty in the past three months is entitled to a free upgrade. Pterm and Putty comes with three months of upgrades and of course a 14-day money back guarantee. We now use FastSpring as our preferred storefront, you can pay with Credit / Debit Cards, PayPal, Amazon payments, Wire Transfer etc. etc. This store is very secure, simple and fast.

There is a multitude of software developed only for the Windows operating system and even when software vendors port their applications to another platform, generally it lacks features that the Windows version contains. The only solution these developers face is to have access to both systems for testing which leads to increased infrastructure demands, and wasted project resources. Our goal is to have native ports of essential Windows tools and applications made available for MacOS users. All Material and Software (C) Copyright 2018 Wine Reviews. All Rights Reserved.
