

William Edwards Photography Sponsors School ID

Published on 09/28/18

Good School Tools announced today that William Edwards Photography became the first school photographer to sponsor School ID Cards and Photos, Version 3.5.0. Palmdale High School was provided with a one year subscription to create electronic Student IDs. Good School Tools has provided student ID services schools for nearly two decades. They are simplifying the input of the student roster and streamlining ID distribution so that everyone may benefit.

San Diego, California - School ID Cards and Photos Version 3.5.0 revolutionizes the way student IDs are made and distributed. William Edwards Photography sponsored Palmdale High School for a year's subscription to School ID.

Palmdale High School joins other schools with the following capabilities. Administrator's phones contain all student IDs. School ID will verify any student's identity on the spot, on site or remotely. Individual student IDs are distributed directly to the student's phone, no need to print cards or rely on students to carry them. Mug-books are created and displayed on the phone. Immediately find a group of students by name (full or partial), gender, and grade.

Would you like to ask a student to show their ID on their phone, scan the barcode, and verify the ID on your phone? No need to be on a wireless network, and on the first day of school. School ID makes that possible. Verify student identity in schools with thousands of students instantly. Stop unwanted or deceptive incursions on your campus.

Would you also like to provide services to students without their ID? Provide food, library, and other services on the spot, anywhere on or off campus. You will have the entire roster of students on your phone. Ask them for name, or date of birth. Bring up their ID, verify them by photo, and scan the ID barcode to provide essential services. Provide services requiring positive student ID instantly.

Have a situation where you are looking for a student and only have partial information? School ID allows you to put in a partial name, select gender, and grade. It returns all the students matching this criteria in a scrollable page with photos so you can quickly find the student of interest. No more looking through printed "mug books" to find someone. Save time and use your school photographer's photos efficiently. You can also use the phone's camera to input photos of students for those who have missed photo day, are new, or simply need a photo to supplement their ID based on your roster.

Good School Tools has provided student ID services schools for nearly two decades. We are simplifying the input of the student roster and streamlining ID distribution so that everyone may benefit.

School ID information is kept on your phone so you can access your critical information even when wireless networks are down or you are in remote locations. You may enter a PIN so that only you may access student information. Once you set up your school roster and photos in one app, it can be easily shared over wireless link to our other apps.

Device Requirements:

- * iPhone, iPad, and iPod touch
- * Universal Application
- * Requires iOS 11.0 or later
- * 16.2 MB
