

Mireth Technology Updates NetShred X - v5.2.9

Published on 10/29/18

Mireth Technology announced a new release of NetShred X, its internet track remover app for Mac. Version 5.2.9 adds support for macOS 10.14 Mojave. NetShred X is an easy-to-use internet track remover app for Mac that clears files web browsers and email apps leave behind. And like all Mireth Technology apps, it is designed to be easy to use.

Richmond, Canada - Mireth Technology Corp. has released version 5.2.9 of NetShred X, the easy to use internet track remover app that removes browsing data. NetShred X runs on Mac.

Version 5.2.9 makes the following changes:

* Adds support for macOS 10.14 Mojave

NetShred X is an easy-to-use internet track remover app for Mac that clears files web browsers and email apps leave behind. And like all Mireth Technology apps, it is designed to be easy to use.

Because internet privacy software can't be effective if it's not used, NetShred X is designed to run automatically, without user intervention. And since removing browser cache, history, email trash and junk can take some time, NetShred X is designed to run in the background, so using the app doesn't interfere with web browsing.

Most importantly, NetShred X is an effective method of removing internet browsing data and email tracks, including browser cache, internet history, email Trash and Junk, Download, Quicktime and Mail cache, favicons, top sites, site passwords, cookies, as well as html, Java, Flash and other Plug-in cache.

Pricing and Availability:

NetShred X is available for immediate download at \$24.95 for an annual subscription. Educational pricing and volume discounts are available. NetShred X runs on Mac. For more information about NetShred, visit the NetShred website.
