

Cisdem Data Recovery Adds Support for macOS Mojave and More File Formats

Published on 11/23/18

Cisdem announces an update for its data recovery app, Cisdem Data Recovery for Mac 5.5.0. The update offers support for macOS 10.14 Mojave and more recoverable file formats. Cisdem Data Recovery recovers photos, documents, videos, audios and other types of files from Mac internal hard drive, external hard drive, SD card, USB flash drive and other portable storage devices.

Madelia, Minnesota - Cisdem is proud to announce the release of Cisdem Data Recovery for Mac version 5.5.0. The new version comes with full support for macOS 10.14 Mojave and more supported file formats, among other improvements.

Cisdem Data Recovery can recover lost data, deleted data, formatted data and data lost from other data loss scenarios. It can recover photos, documents, videos, audios and other types of files from Mac internal hard drive, external hard drive, SD card, USB flash drive and other portable storage devices.

"The new version can perfectly support macOS Mojave," said Edward Riley, Cisdem's project manager. "Enough new features makes it worthwhile to upgrade to Mojave. It's the same with our data recovery app. We have optimized it for Mojave and added a number of supported file formats such as ERF, AAC, M4A and PST. These are the newcomers on the long list of file formats supported by Cisdem Data Recovery. The new version also improves user experience by adding pause and resume option and fixing some minor bugs."

What's New in Version 5.5.0

- * Support macOS 10.14 Mojave
- * Add support for new file format: ERF, AAC, M4A, PST, EMLX, Pages, Numbers, Keynote
- * Add pause and resume option to Advanced Data Recovery mode
- * Fix the crash problem in the scan process
- * Fix the crash problem in basic Scan when scanning FAT drive
- * Fix some minor bugs

Main Features of Cisdem Data Recovery for Mac

1. Recover documents, photos, audios, videos, etc.

Support various file formats and all common file types such as images, videos, music, archives, emails and more

2. Support different file systems

Recover lost, deleted and formatted data from APFS, HFS, FAT16, FAT32, exFAT and other common file systems

3. Recover data on various storage devices

Recover files from internal or external storage devices including hard disk drive, solid state drive, SD card, flash stick, iPod, MP3 player, etc.

4. Apply to all data loss situations

Recover data regardless of data loss causes. No matter it is data deleting, disk formatting, virus infecting or factory resetting, etc.

5. Offer 5 data recovery solutions

Provide five data recovery solutions for different situations

6. Allow users to preview during scanning

Users are allowed to preview files during and after scanning. Three preview modes are

prMac: Publish Once, Broadcast the World :: <http://prmac.com>
