

CS Odessa's New ConceptDraw Project 4 is Released

Published on 09/16/07

Odessa, Ukraine, September 13, 2007 - CS Odessa today announced the general availability of ConceptDraw Project 4 for Macintosh and Windows. The newest release of ConceptDraw Project 4 project management software is designed to plan and track a wide range of projects simultaneously and to accurately allocate and manage any shared resources between all supervised projects.

CS Odessa today announced the general availability of ConceptDraw Project 4 for Macintosh and Windows. The newest release of ConceptDraw Project 4 project management software is designed to plan and track a wide range of projects simultaneously and to accurately allocate and manage any shared resources between all supervised projects. Also added to Project 4 is a "Resource Usage View", enhanced Microsoft Project compatibility, a redesigned tabular project interface and a number of commonly requested usability improvements.

The addition of "Resource Usage View"; in Project 4 permits project managers to quickly ascertain an accurate view of resource loading and task allocation for each available resource. Project 4 represents the project data in a clear, compelling visual presentation displaying a color-coded representation of resource usage; possible areas of potential resource misalignment are highlighted for clear viewing. "Resource Usage View"; is an essential tool for quickly finding over and under allocated workers and then being able to precisely balance against the project requirements.

The ConceptDraw Project user interface has undergone some important changes in version 4, providing even quicker navigation between projects and different status views, these changes dramatically speed up the task of project management. With Project 4 tasks and resources contained in all projects are clearly laid out making it easier to supervise each individual project as well as all the projects contained in the manager's portfolio. These user interface changes have been introduced in Project 4 to make project operations easier and faster for both beginner and experienced users.

ConceptDraw Project 4 is an Universal Binary application and requires Mac OS X 10.4 or greater to run. All purchasers of ConceptDraw Project 3 from August 15, 2007 until ship date are eligible to receive a no cost upgrade to Project 4.

ConceptDraw Project 4 is available at the price of \$199 USD. Volume purchase discounts, educational and non-profit pricing is also available. More information about ConceptDraw Project 4 and free trial version located on our website. Owners of earlier versions can upgrade to ConceptDraw Project 4 for only \$119.
