

## KeyCue celebrates 15th anniversary with half-price offer and version 9.3

Published on 05/14/19

Celebrating its 15th anniversary, Ergonis Software today released KeyCue 9.3, an update to the company's keyboard shortcut and emoji tool for macOS. KeyCue has become a versatile assistant, which presents frequently used elements on cue, such as keyboard shortcuts, local files and folders, and URL collections. Since version 9, KeyCue is also the perfect tool for discovering and using the constantly growing number of emojis. Save 50% off the regular price when ordering KeyCue during May 2019.

Perg, Austria - KeyCue, Ergonis' highly acclaimed keyboard shortcut and emoji tool, celebrates its 15th anniversary with the release of version 9.3 and an exclusive half-price offer.

The first version of KeyCue was released in May 2004 as a mere keyboard shortcut cheat sheet. Its original purpose was to help Mac users to learn and use keyboard shortcuts. Since then, it has become a versatile assistant, which presents frequently used elements on cue, such as keyboard shortcuts, local files and folders, and URL collections. Since version 9, KeyCue is also the perfect tool for discovering and using the constantly growing number of emojis.

"We are very happy about the long-lasting worldwide success of KeyCue and to celebrate KeyCue's 15th anniversary," said Christoph Reichenberger, founder and CEO of Ergonis Software. "We invite the Mac community to celebrate with us and to get KeyCue at 50 % off now."

In celebration of this anniversary, customers can save 50% off the regular price when ordering a license for KeyCue during May 2019. To get the discount, enter the coupon code "KeyCue15" during the checkout process at Ergonis' online store <https://store.ergonis.com>. The coupon code is good for all KeyCue purchases at the Ergonis online store except upgrades and site licenses.

While the online community loves emojis, people become more and more frustrated about the confusing multitude of slightly different emojis, which makes it tedious to choose and type the right one. This is where KeyCue comes to help. KeyCue shows a table of all available emoji characters and lets you insert any emoji with a click. To find out more about a certain emoji, move the mouse pointer over it to see an enlarged view and a description of the emoji's meaning. Finding and typing the right emoji has never been easier.

KeyCue 9.3 shows emoji characters slightly larger and therefore makes them easier to distinguish. It also improves the handling of URLs in URL collections. Besides that, the new version contains a number of fixes and enhancements behind the scenes to improve overall stability and compatibility with future versions of macOS.

Visit Ergonis Software's website to learn more about the changes in this release and to download and try the new version.

### System Requirements:

\* KeyCue 9.3 requires Mac OS X 10.7 or newer and is recommended for macOS Mojave (10.14).
