

ChronoSync Express Maintenance Release

Published on 06/12/19

Econ Technologies releases ChronoSync Express 1.3.1, an important update to their entry level version of ChronoSync for macOS. It provides the basic file synchronization, backup & scheduling capabilities found in ChronoSync but at a more affordable price. With improved quality and reliability, version 1.3 several potential rare crashes are resolved, reliability is improved and ChronoSync Express now more efficiently stores, loads and saves the Scheduler Database.

Casselberry, Florida - ChronoSync Express 1.3.1, now available free to registered owners, continues Econ Technologies' commitment to excellence with improved quality and reliability. Several potential rare crashes are resolved, reliability is improved and ChronoSync Express now more efficiently stores, loads and saves the Scheduler Database.

Duilio Proni, President of Econ Technologies, Inc. said "ChronoSync Express benefits from all the development behind the full version of ChronoSync." Adding, "When our engineers complete a maintenance cycle on ChronoSync, everything learned is next rolled into ChronoSync Express to keep our Mac App Store and Setapp customers up to date."

See the details of all the changes in the Release Notes.

Owners of ChronoSync Express can start using these new features today with a free update! If you don't already own ChronoSync Express, you can find it on the Mac App Store for \$24.99 (USD). Or try ChronoSync Express along with over 140 other Apps as part of the Setapp subscription service. ChronoSync Express is designed to work on macOS version 10.10 and newer.

Econ Technologies, Inc has been creating Apple software for over 20 years. ChronoSync Express is part of a suite of macOS and iOS products. ChronoSync Express is the entry level version of ChronoSync, the complete synchronization and backup utility for macOS. It is the perfect tool for those who want to synchronize files and folders between two computers. It can also perform local backups to external hard drives, NAS devices and file servers. For high performance file sharing, it is fully compatible with ChronoAgent. It can even exchange files with iOS devices running InterConneX and send completion notifications to your iPhone via ChronoMonitor.

Econ has produced software that runs on Apple products for over 20 years. Econ Technologies, Inc. was established in Central Florida in 1991. It is named after the Econlockhatchee River, which flows past the site of our original office where all of this began. On October 31, 2001 we introduced our first app, Portraits & Prints, that was developed specifically for macOS. We followed that up with ChronoSync which was first released February 15, 2002. Since that time ChronoSync has gone through numerous updates and we have never charged for a single update. On July 29, 2013 we launched InterConneX for the iPad followed by InterConneX for the iPhone in September. All Material and Software (C) Copyright 2019 Econ Technologies. All Rights Reserved. Apple, the Apple logo, Macintosh and macOS are registered trademarks of Apple Inc. in the U.S. and/or other countries.
