

## Cryptocurrency Twin Launches App to help Investors Avoid Losing Billions

Published on 07/03/19

ZLOADR limited introduces Zloadr - Bitcoin Wallet 1.0, its new due diligence wallet app for iOS and Android devices. Zloadr - Bitcoin Wallet offers the latest, most transparent information on cryptos before investing. The app provides banks, investors and financial institutions with free unbiased solidly researched information that is completely transparent; useful and reliable when providing loans, financial assistance or making investment decisions on crypto-backed properties and assets.

London, United Kingdom - ZLOADR limited today is proud to announce the release and immediate availability of Zloadr - Bitcoin Wallet 1.0, the company's new due diligence wallet app developed for iOS and Android devices. The fully-transparent due diligence wallet app provides banks, investors and financial institutions with free unbiased solidly researched information that is completely transparent; useful and reliable when providing loans, financial assistance or making investment decisions on crypto-backed properties and assets. Users can send, trade, receive, and store cryptocurrency with a greater sense of security that they are being well-informed before and during the decision-making process.

"We are the only platform offering due diligence and scores on various currencies and platforms for free" commented founder Sam Enrico Williams, who is one of the "cryptocurrency twins", well known and respected in the crypto world for launching a cryptocurrency from their mums' kitchen, which turned them into multi-millionaires overnight. He goes on to say: "We provide answers to vital investment questions for our users on a number of cryptocurrencies and crypto related assets, that are available on the market to use or invest in."

Some of the many highlights of the features of the Zloadr app include: providing Research & Insights, which include due diligence scores, due diligence reports, and due diligence filtering; the ability to Send & Receive Traditional Currencies, with low transaction fees and allowing users to be able to exchange between different cryptocurrencies as requested. As the app continues to spread and grow, more features are sure to be added to keep Zloadr on the cutting-edge of crypto-related resources and tools.

The Zloadr app clearly makes it over the bar as a fresh new way for investors to make well-informed decisions when it comes to cryptocurrency investments or making moves of some kind with the cryptocurrency they already own.
