

## **Moth Software announces Mail Archiver X 5.1 - faster than ever**

Published on 07/09/19

Moth Software today announces Mail Archiver X 5.1 for Mac OS X, an important feature update to their app designed as a companion to the user's email application. Particularly valuable for businesses and individuals alike, Mail Archiver X allows consolidation, archiving, and permanent storage of emails. Emails may be saved in the application's native database format, Evernote, Filemaker or PDF. Version 5.1 makes archiving from AppleMail so much faster.

Heidesheim, Germany - Moth Software is proud to announce the release of Mail Archiver X 5.1 for Mac OS X, an update to their app that serves as a companion to the user's current email client, allowing consolidation, archiving, and permanent storage of emails. Emails may be saved in the application's native database format, Evernote, Filemaker, or PDF. Archiving emails from a variety of email applications into a single database, the app prevents accidental deletions, facilitates quick searches, and eliminates the storage size limits imposed by many email apps and companies. By saving emails in a single, standardized format, users are ensured that they can read all their emails, even those from legacy applications, from which they have subsequently migrated.

Following the archiving process, users may browse or search from the Mail Archiver X viewer.

Version 5.1 makes archiving from AppleMail much faster.

Other new Features for Mail Archiver X 5.1 are:

- \* Writing to the index is faster than before.
- \* It's possible to re-upload mails to an IMAP server.
- \* Added support for the new MailTags version.
- \* It's possible to delete/change the Gmail authentication.
- \* Exporting works with a large selection.
- \* Archiving to Filemaker is about 20-30% faster and is less likely to have errors.

Feature Highlights of Mail Archiver X are:

- \* An ideal email management and archive solution
- \* Protect and save all emails in a single archive folder
- \* Archives emails from the following formats: Mail, Outlook, Postbox, Powermail, Thunderbird, and standard mbox
- \* Exports emails to the following formats: Internal Database, Evernote, Filemaker, PDF, mbox, or Text
- \* Built-in email database browser
- \* Filemaker support, when using the Filemaker Version 16 or higher archive.

Pricing and Availability:

Mail Archiver X 5.1 costs \$44.95 (USD) and is available directly from Moth Software. A free, fully-functional, 10-day trial version can be downloaded. Mail Archiver X 5.1 comes with a 30-day, money back guarantee. Review copies are available upon request.
