

## **New High Performance Wireless Earbuds to Take on the Market Leader**

Published on 08/14/19

AirEarbud introduces its first earbuds WAVE S1 on their e-store to take on the market leader, Apple's Airpods. AirEarbud aims at designing products that are clean, friendly, and above all, simple to use - a set of principles that Apple also adopts to separate its products from the rest. WAVE S1 invites users to discover a freedom of expression in sound, style and movement with innovations like HIFI Superior sound and intuitive touch control.

Hong Kong - AirEarbud introduces its first earbuds WAVE S1 on their e-store to take on the market leader, Apple's AirPods. AirEarbud aims at designing products that are clean, friendly, and above all, simple to use - a set of principles that Apple also adopt to separate its products from the rest.

Wireless earphones have revolutionized the way we enjoy listening to content while on the move. Gone are the days when we needed to clutch an unruly tangle of cables from our pocket, only to spend half the train ride trying to unravel them in order to listen to our favorite podcast.

For the wireless generation, bluetooth earphones are the ultimate, daily accessory but finding that perfect pair can be tricky. This week's release of an all new ultra-lightweight, high performance earphone could change all that. The WAVE S1 is the first wireless earbud to launch to market from AirEarBud and its high-tech features rival the market leader Airpods.

WAVE S1 invites users to discover a freedom of expression in sound, style and movement with innovations like HIFI Superior sound and intuitive touch control. Each WAVE S1 wireless earbud weighs just 4g and is created with the natural contours of the human body and lifestyle in mind, using an anti-drop out and IPX6 Waterproof design.

The AirEarBud brand is backed by CAZE, manufacturer of the world's thinnest cases and bumpers for iPhone and their aim is to break away from the wired era to service a totally wireless generation.

The WAVE S1 is a triumph of modern, wireless technology. The intuitive touch interface allows users to start/stop and change tracks, take calls, activate voice commands and more with just a tap on the earpiece.

"At AirEarbud our aim is to create a world where people can communicate with each other and enjoy content without restriction," says AirEarBud founder Martin, "We envision a world where music lovers can enjoy listening to the best quality music, where your favorite films and TV series are enhanced by great quality audio and where friends and business associates can communicate seamlessly regardless of their geographical location."

The WAVE S1 wireless earbuds are ready to move when you are. Simply put them into your ears and let the Bluetooth 5.0 instant iOS pairing take over and intelligently switch from calls to content as and when required. WAVE S1 pairs equally well with Android devices with up to 4 hours of talk and play time.

The AirEarBud WAVE S1 earbuds come equipped with a powerful and stylish charging case for 32 hours of extra battery life, a micro-USB cable and user guide and have a 30-Day Money-Back Guarantee and 12-month warranty.
