

Time Squad: Alpha Strike! introduced for iOS - New Space Shooter Game

Published on 09/16/19

Biosoftworld Game Studios introduces Time Squad: Alpha Strike! 1.0.1, the company's new space shooting game developed exclusively for iOS devices. It's the 21st century and an elite squadron of advanced combat earth spaceships is coming back through space and time in order to rescue Earth from a catastrophic alien invasion. Players pilot one of the front-end spacecraft in three different vast settings: solar system, earth's orbit and finally in a ground attack against aliens.

Athens, Greece - Biosoftworld Game Studios is proud to announce the release of Time Squad: Alpha Strike! 1.0.1, the company's new space shooting game developed exclusively for iPhone, iPod touch and iPad. Offering unique gameplay, players must fight aliens in the solar system, the earth's orbit and even on the ground. They will have to save occupied Earth and defeat alien ground forces.

An elite squadron of advanced combat earth spaceships is coming back in the 21st century through space and time in order to rescue Earth from a catastrophic alien invasion. This elite squadron will try to penetrate the alien defences in our solar system and on earth's orbit. If this happens an alpha strike against alien ground forces will be possible.

Players pilot one of the front-end spacecrafts in three different vast settings: solar system, earth's orbit and finally in a ground attack against aliens. They may encounter alien spaceships, mines, turrets in earth's orbit, missiles, and even earth military assets (like tanks, stealth jets or air-defences) all captured by aliens during invasion. Lastly In order for a player to proceed to an Orbit Attack they must first complete the Solar Attack. The ground assault is endless and everyone can try and reach top High Scores. Players will encounter stealth spacecraft and camouflaged ground forces. All players can share their success with friends on the Game Center leaderboard.

Device Requirements:

- * iPhone, iPad, and iPod touch
- * Requires iOS 8.0 or later
