

PopChar, Typinator, and KeyCue are ready for macOS Catalina

Published on 10/04/19

Ergonis Software today released PopChar X 8.7, Typinator 8.2, and KeyCue 9.5 and makes all their productivity utilities ready for macOS Catalina. PopChar X 8.7 adds support for Unicode 12.0, including the new Emoji 12 characters, KeyCue 9.5 enhances package detection in folder views, and Typinator 8.2 offers faster Quick Search results when many items match the search term. It is recommended to upgrade to these latest versions before switching to Catalina.

Perg, Austria - October 4, 2019: Ergonis Software today released PopChar X 8.7, Typinator 8.2, and KeyCue 9.5 and makes all their productivity utilities ready for macOS Catalina.

Since day one, Ergonis Software has been committed to providing high-quality macOS products that 'just work'. "To achieve this goal, we put a lot of effort into our products behind the scenes to make them do their job flawlessly, fast, and unobtrusively. It is, therefore, no surprise that we are ready to release updated versions of our products right in time before the official release of macOS Catalina." said Christoph Reichenberger, founder and CEO of Ergonis Software. "Said that I am also glad to mention that the newest versions of our products still run on older OS versions back to OS X 10.8 (Mountain Lion)."

Besides compatibility with Catalina, the new versions of the individual products also bring new features and improvements. PopChar X 8.7 adds support for Unicode 12.0, including the new Emoji 12 characters, KeyCue 9.5 enhances package detection in folder views, and Typinator 8.2 offers faster Quick Search results when many items match the search term.

Finally, all new versions also contain fixes and enhancements to improve compatibility and stability on all supported macOS versions and are therefore recommended upgrades for all users, independent from upgrades to Catalina. Visit Ergonis Software's website to learn more about the changes in this release and to download the new version.

Availability and Ordering:

Upgrades and new licenses can be purchased securely at the Ergonis Software online store. The upgrades to the newest versions are free for anyone who owns a valid license for the most recent major version (that is, Typinator 8, PopChar 8, and KeyCue 9). Upgrade paths are available for owners of older licenses. All purchases (new and upgrades alike) include all subsequent minor upgrades at no additional cost. For information about purchases, including enterprise licenses, volume discounts, and upgrade pricing offers, see the company's web site.

Instead of purchasing a license for a single product, customers can save money by ordering the Ergonis Productivity Bundle, which includes PopChar, Typinator, and KeyCue at a significant discount.
