

MaBaSoft Releases World Clock Deluxe 4.16.2

Published on 10/10/19

MaBaSoft announces World Clock Deluxe 4.16.2, an update to their world time utility for macOS. World Clock Deluxe comes with over 1,600 cities and 200 time zones, displays multiple clocks in a horizontal or vertical palette, in the menu bar, or in the Dock, calculates corresponding times in different cities, and allows users to easily identify the best time for meetings across multiple time zones. Version 4.16.2 solves the incompatibilities with macOS 10.15 Catalina and fixes some minor bugs.

Milano, Italy - MaBaSoft announces World Clock Deluxe 4.16.2, the latest version of their popular world time utility for macOS. World Clock Deluxe is a reliable and easy-to-use time tool for companies and organizations regularly communicating with people across the world, frequent travelers, and home users having family or friends in other countries or time zones.

World Clock Deluxe displays multiple digital or analog clocks in a highly configurable horizontal or vertical palette, in the menu bar, and in the Dock, and can show the time in over 1,600 cities and 200 time zones and world times, including Greenwich Mean Time, Coordinated Universal Time, and Internet Time. It comes with a variety of date and time formats and can display seconds, weekday, date, date change, time zone, offset from UTC, and offset from local time.

With World Clock Deluxe users can easily organize clocks so that they always have a good overview of the displayed times. Colors and labels can be assigned to clocks to quickly single out the local clock or different groups of clocks. Clocks can be sorted by name, time, longitude, longitude offset, or label. Seldom used clocks can be hidden and different clocks can be displayed in the palette, in the menu bar, and in the Dock.

World Clock Deluxe also helps users with phone calls to other countries and international meetings. The Time Converter quickly calculates corresponding dates and times in different cities or time zones, while the Meeting Planner allows users to easily identify the best time for online chats, conference calls, or video conferences across multiple time zones. Conversion results and meeting details can be easily shared via Mail or Messages, saved to a note, or added to a reminder.

With World Clock Deluxe, users can finally show the weather all over the world. World Clock Deluxe downloads National Oceanic and Atmospheric Administration (NOAA) weather reports and displays temperature, pressure, visibility, wind conditions, and precipitations.

Version 4.16.2 solves the incompatibilities with macOS 10.15 Catalina, updates daylight-saving time information for Fiji and Norfolk Island, and fixes some minor bugs.

Language Support:

* English, German, French, Dutch, and Italian

System Requirements:

* macOS 10.11, 10.12, 10.13, 10.14, or 10.15 (Catalina)
