

2D CAD Program CADintosh 8.5 Adds DWG Export, WYSIWYG Font Menu, More

Published on 10/28/19

Indie developer, Lemke Software GmbH today announces CADintosh 8.5, the important update to its high performance 2D CAD program for macOS. Designed for use by Technical Draftsmen and Designers, the app offers users a wide variety of tools to create technical, mechanical, and architectural drawings. Version 8.5 brings a variety of new features and updates, including a new DWG export feature, localizations, additional drawing data fields, a WYSIWYG font menu, and more.

Peine, Germany - Award-winning independent Mac developer, Lemke Software GmbH today is pleased to announce the release and immediate availability of CADintosh 8.5, an important update to its popular high performance 2D CAD program for the Mac. The app delivers a large variety of CAD tools to Technical Draftsmen, Designers, and other users that create professional technical, mechanical, and architectural drawings.

CADintosh offers a comfortable and simple user interface, providing a large number of usability and workflow advantage over other apps of its kind. The number of CAD elements that can be used in the app is limited only by the available memory in the user's Mac. The app offers 8 pens with fully definable line widths and colors, 6 different line types, and supports 1,024 layers. Pre-settings are saved with each drawing.

"CADintosh was already the most powerful and easy to use 2D CAD program available on the Mac," says Thorsten Lemke, president of Lemke Software. "Version 8.5 builds upon that, as the cumulative result of over twenty years of development by our team of industry experts."

CADintosh creates drawings composed of multiple layers that can easily be organized into groups. The app supports up to 1,024 layers and up to 32,000 groups. The app offers a wide variety of design tools that can be used to create professional CAD drawings.

Features Include:

- * Comfortable and simple user interface
- * Number of elements only limited by the Mac's available memory
- * Pre-settings saved for each drawing
- * Includes 8 pens with freely definable line widths and line colors
- * Includes 6 different line types
- * Offers line widths from 0.0 to 99.99 mm
- * Each element can be designated a different color and width
- * Functions for lines, circles, dimensioning, hatching, X-lines, etc.
- * Allows up to 32,000 groups
- * Supports up to 1,024 layers
- * Offers Complex layer management
- * Easy import and export of DXF, HPGL, IGES and PDF formatted files
- * 64-bit and unicode support
- * Support for symbol libraries for the import and export of symbols
- * Alternative units (i.e. inches)
- * Runs natively on macOS
- * Supports Retina displays
- * Helpful Tutorial

The app's easy-to-use tools allow anyone to create lines, circles, text, dimensions, X-lines, hatching, and set scale within their drawing. Users can access 8 different pens of variable widths, colors, and styles from the app's convenient drop-down menus. Available line types include full line, dotted line, chain line, dotted line with two

dots, zigzag line, and short dotted line. Adjustable line widths range from 0.0 to 99.99 mm and can be set to different colors and widths.

CADintosh 8.5 brings several new and updated features. The update also provides bug fixes and performance enhancements.

New features include:

- * DWG export
- * Dialog for setting the default unit and scale upon creating a new drawing

Updated features include:

- * Localizations
- * Added more drawing data fields (changes document file format)
- * Added identifiers to drawing data dialog
- * Enhanced contrast of thumbnail icon
- * Added font and text height to available set options
- * WYSIWYG font menu with option to disable in the preferences

CADintosh allows easy importing and exporting of several file types, including DXF, HPGL, IGES and PDF. While the app already includes a wide selection of internal symbols, paid versions of the app can also import and export symbol libraries. Created symbols can be saved in an archive. Projects can be created using either imperial or metric units.

We make CADintosh free to try, so that users can run it through its paces before paying," continues Thorsten. "We know once users see what the app offers, they'll appreciate its excellent return on investment."

Language Support:

- * English, Danish, French, German, Italian, Japanese, Spanish, Portuguese

Device Requirements:

- * macOS 10.8 or later
- * macOS 10.15 Catalina Compatible
- * 43.3 MB

Pricing and Availability:

CADintosh 8.5 is only \$33.99 USD (or an equivalent amount in other currencies) and is available worldwide through the Mac App Store in the Graphics & Design category. It can also be directly purchased online from the Lemkesoft website for \$32.00 (USD). Version 8.5 is a free update for all CADintosh 8.x users. The upgrade from 1.x-7.x to 8.x is \$19.95 (USD) on the Lemke website.
