

## LinkOptimizer for Adobe InDesign Now Supports macOS Catalina

Published on 10/30/19

Zevrix Solutions announces LinkOptimizer 5.3.11, a compatibility update to company's workflow automation solution for Adobe InDesign. Awarded 4 out of 5 stars by Computer Arts magazine, LinkOptimizer can reduce InDesign link size by resizing images to their final dimensions at a target resolution specified. The app can also assign colors profiles, convert file formats, and perform image adjustments. The new version makes LinkOptimizer compatible with the recently released macOS 10.15 Catalina.

Toronto (ON), Canada - Zevrix Solutions today announces the release of LinkOptimizer 5.3.11, a compatibility update to company's image workflow automation solution for Adobe InDesign. LinkOptimizer automates complex image manipulation tasks and helps InDesign users reduce the link size, save time and production costs, and repurpose InDesign documents for web and mobile devices.

The new version introduces support for the recently released macOS 10.15 Catalina by solving several issues that could result in incorrect location of duplicated InDesign document as well as image relinking errors on the new system. The update is offered free of charge to the licensed users of version 5.

"LinkOptimizer has changed my life and saved me days and days of work as a retoucher for an international quarterly magazine," says Steve Krason of Chicago based SK Design Group. "It's a lifesaver".

LinkOptimizer works automatically with Photoshop to eliminate the excess image data of InDesign links, perform essential image adjustments such as color conversion and sharpening, and convert image formats. For example, with just a click of a button users can:

- \* Batch process multiple InDesign files and books
- \* Scale and crop images to match their dimensions in InDesign
- \* Change their resolution to 300 dpi
- \* Convert RGB images to specific CMYK profile
- \* Flatten images
- \* Resave JPEGs as PSD
- \* Run a Photoshop action on each image

As a result users can save gigabytes of disk space and countless hours of optimizing images manually, accelerate document output, reduce job turnaround and cut costs through faster processing.

### Pricing and Availability:

LinkOptimizer can be purchased from Zevrix website for \$259.95 USD (Lite version: \$179.95) as well as from Adobe Exchange and authorized resellers. Trial is also available for download. The update is free for LinkOptimizer 5.x users and \$130 to upgrade from previous versions. LinkOptimizer requires macOS 10.8-10.15 and Adobe InDesign / Photoshop CS5-CC 2019.
