

Package Central for Adobe InDesign Now Supports macOS Catalina

Published on 11/04/19

Zevrix Solutions announces Package Central 1.11.8, a compatibility update to company's solution to package Adobe InDesign documents automatically from watched hot folders. Package Central can serve unlimited users on a network and offers automatic email notifications, PDF/IDML export, variable output folder names and more. The new version adds support to the recently released macOS 10.15 Catalina, improves memory management and introduces safeguards against accidental file deletion.

Toronto (ON), Canada - Zevrix Solutions today announces Package Central 1.11.8, a compatibility update to company's file packaging automation solution for Adobe InDesign. Originally developed for a major publisher in the United States, the software automates InDesign document collection by processing files from watched hot folders. Package Central solves the problem of centralized packaging and archiving of InDesign projects in a workgroup environment while serving unlimited users on a network.

The new version introduces support for the recently released macOS 10.15 Catalina and is offered free of charge to licensed users. The update also improves memory management and adds safeguards against accidental file deletion when clearing jobs on the errors list.

Under the Package Central workflow, prepress operators and designers simply copy files to watched hot folders that reside on a network. The software automatically collects InDesign documents along with their fonts and links into the specified destination folders. Package Central offers the following key features:

- * Automatically package InDesign files from watched hot folders
- * Create hot folders for various packaging settings
- * Create PDF and IDML files on the fly
- * Assign variable package folder names
- * Automatic email notifications on process stages and errors
- * Update modified links automatically
- * Detailed processing logs
- * Maintain a single set of settings for entire workgroup

Pricing and Availability

Package Central can be purchased for \$149.95 (USD) from Zevrix website, as well as from authorized resellers. Trial is also available for download. Package Central requires macOS 10.8-10.15 and Adobe InDesign CS5-CC 2019.
