

File Transfer App Deliver Express Now Supports macOS 10.15 Catalina

Published on 11/18/19

Zevrix Solutions announces Deliver Express 2.6.11, a compatibility update to company's hot folder based file transfer automation solution. Deliver Express supports FTP, SFTP, WebDAV, Amazon S3 and other remote and local services. The software offers automatic email delivery notifications, file compression, upload history, instant PDF creation and more. The app can serve unlimited users on a network. The new version introduces support for macOS 10.15 Catalina in a free update to licensed users.

Toronto (ON), Canada - Zevrix Solutions today announces Deliver Express 2.6.11, a compatibility update to company's file transfer automation solution. Deliver Express sends files automatically from watched hot folders and supports FTP, SFTP, Amazon S3, WebDAV, SMB and other remote and local destinations. The software can run absolutely unattended and offers email notifications, delivery to multiple targets, file compression and encryption, and much more.

The new version introduces support for the recently released macOS 10.15 Catalina and is offered as a free update to licensed users. Deliver Express has been notarized by Apple, which is a mandatory requirement on Catalina as part of Apple's experimental security policy.

"What's great about Deliver Express for organizations is the unattended nature of using a hot folder," writes Jeffrey Mincey on Mac360.com. "It's perfect for all kinds of file delivery. Sensitive documents, encrypted files, financial information, graphic files, photographs, large files and so on."

Deliver Express is an ideal solution for printers, ad agencies, photographers, recording studios, legal offices and other users. The app watches hot folders where users can drop their files for automatic delivery to the assigned destinations. An email confirmation will be issued upon transfer completion. Recipients can easily retrieve the files through the link in the notification email. Deliver Express offers the following key features:

- * Automate file delivery from watched hot folders
- * Supports FTP, SFTP, WebDAV, Amazon S3 and other remote and local servers
- * Automatic email notifications based on variable templates
- * Serve unlimited users on a network
- * Create lo-res PDF on the fly and attach to notification email
- * Automatic file compression and encryption

Pricing and Availability:

Deliver Express can be purchased from Zevrix website as well as from authorized resellers. The license prices are based on the maximum number of allowed destinations and range from \$29.95 to \$299.95 (USD). The update is free for licensed customers. Trial is also available for download. Deliver Express requires macOS 10.8-10.15.
