

Mailbutler's Mobile App Gets a Major Update With New Features!

Published on 11/18/19

This week Mailbutler's mobile app for iOS and Android has undergone a major update. Users can now directly send emails from their Mailbutler app with access to the productivity features of the desktop extension - Tracking, Send Later, Signatures, Message Templates, Notes, Tasks and Follow-up reminders. The update also introduces advanced filtering options (for emails, notes and tasks), dark mode and self-tracking prevention.

Berlin, Germany - Mailbutler, creator of the leading email productivity tools that help professionals and teams enhance their inbox, has introduced a major update to its mobile app for iOS and Android. The new features transform the mobile app from an information hub to a standalone email tool.

Compose window

Users can now directly send emails from their Mailbutler app. What's more, they now have access to the powerful productivity features of the desktop extension: Tracking, Send Later, Signatures & Message Templates, Follow-up Reminders and more.

Dark Mode

After the successful introduction of dark mode to its desktop extensions, Mailbutler has now brought dark mode to its mobile app!

Self-tracking Prevention

Mailbutler users can now receive more reliable tracking information by excluding email opens from their own mobile device.

Advanced filtering options

Mailbutler users can now apply a vast range of new filter options to Notes, Tasks and Mailbutler-enhanced email in their mobile overview.

Fabian Jager, CTO and Co-founder of Mailbutler said: "Ever since we launched our mobile app, there has been a strong demand from our userbase for tracking and scheduling emails through mobile. With the latest improvements, we give users access to twenty-first century email tools even when on the go."

Mailbutler is a German software company founded in 2015 with the goal of helping professionals and teams manage emails better. The company's productivity tool comes with a substantial suite of features that help over 100k professionals achieve their ideal work-life balance. It lets them schedule emails ahead of time, keep track of opened links and emails, easily manage multiple signatures, turn messages into tasks and much more. The light-weight tool also brings teams together with its collaborative features: easily share custom signatures, templates, delegate tasks and collaborate on notes - all without leaving the inbox.
