

ArtOptimizer for Adobe Illustrator Now Supports macOS Catalina

Published on 12/09/19

Zevrix Solutions announces the release of ArtOptimizer 3.0.5, a compatibility upgrade to company's image workflow automation tool for Adobe Illustrator. ArtOptimizer helps users reduce the size of Illustrator links and automate complex image transformations. The software also offers image format and color conversion, batch processing, settings presets, and much more. The new version adds support for the recently released macOS 10.15 Catalina and improves compatibility with Illustrator 2020.

Toronto (ON), Canada - Zevrix Solutions today announce release of ArtOptimizer 3.0.5 for Adobe Illustrator, a compatibility upgrade to company's image workflow automation solution. The only tool of its kind on the Mac market, ArtOptimizer eliminates the excess image data of Illustrator picture links and performs essential image adjustments. The software helps users save disk space as well as cut production time and reduce operational costs through automation of complex image manipulation tasks.

The new version adds support to the recently released macOS 10.15 Catalina, and is offered free of charge to licensed users of ArtOptimizer 3. The update also addresses an issue in which Illustrator files could not be open in Creative Cloud 2020. In addition, the new version introduces several UI fixes and improves the action of the Reveal in Finder command.

ArtOptimizer is a powerful automation solution for users in the print, prepress, and web design industries. For example, with just a click of a button users can:

- * Process multiple Illustrator files
- * Scale images in Photoshop to match their dimensions in Illustrator
- * Change image resolution to 300 dpi
- * Convert RGB images to CMYK profile
- * Resave JPEG files as PSD
- * Merge layers and delete unused ones

In the end of processing ArtOptimizer reimports images to Illustrator at 100% in their precise position. As a result users can save gigabytes of disk space and countless hours of optimizing images manually. In addition, ArtOptimizer helps users accelerate document printing and exporting to PDF, speed up file transfer to service providers, reduce job turnaround, and cut costs through faster processing.

Pricing and Availability:

ArtOptimizer can be purchased from Zevrix web site for \$120 (USD), as well as from authorized resellers and Adobe Exchange. Licensed users of earlier versions can upgrade to ArtOptimizer 3 for \$60. Trial is also available for download. ArtOptimizer requires macOS 10.8-10.15 and Adobe Illustrator/Photoshop CS6-2020.
