

Output Factory for Adobe InDesign Improves Modified Links Auto-Update

Published on 02/05/20

Zevrix Solutions announces Output Factory 2.4.21, a maintenance update to company's output automation plug-in for Adobe InDesign. Output Factory automates printing and exporting from InDesign helping users eliminate repetitive tasks and avoid costly errors through batch processing and auto-preflighting. The new version restores the option to update InDesign links automatically on macOS Catalina, which was disabled due to a bug, and improves PNG file export with transparent background.

Toronto (ON), Canada - Zevrix Solutions today announces the release of Output Factory 2.4.21, a maintenance update to company's output automation plug-in for Adobe InDesign. Awarded 5 stars by InDesign Magazine, Output Factory automates and simplifies workflows of printers, prepress houses, publishers, and design agencies worldwide. The software helps eliminate repetitive tasks and costly errors through batch processing, automatic preflight, and time-saving output options.

The new version restores the option to automatically update InDesign links before processing on macOS Catalina, which was disabled due to a bug in InDesign's AppleScript engine. The update also improves the reliability of PNG file export with transparent background and addresses an issue that affected exporting of non-consecutive page ranges of InDesign documents with alternate layouts as single files.

"Using Output Factory is straightforward. You determine your settings and sit back while Output Factory does all the heavy lifting. The time savings are huge," writes Jamie McKee in InDesign Magazine. "If you find yourself repeatedly exporting InDesign files in various formats, you owe it to yourself to install the free trial and see just how much time you'll save using Output Factory."

Output Factory supports printing as well as exporting to PDF, EPS, PostScript, Flash, HTML, EPUB and several image formats. The software offers the following key features:

- * Batch output of InDesign files
- * Variable output file names
- * Export page groups as a single files
- * Output files to multiple formats with one click
- * Create PDF security presets
- * Layer versioning: output layer combinations as single files
- * Eliminate errors with automatic preflight
- * Send output files to FTP and other servers

Pricing and Availability:

Output Factory can be purchased from Zevrix website for \$170 USD (Lite version \$120), as well as from authorized resellers and Adobe Exchange. Trial is also available for download. The update is free for the users of Output Factory 2.x, and \$85 to upgrade from Output Factory 1.x and BatchOutput. Output Factory requires macOS 10.8-10.15 and Adobe InDesign CS5-2020.
