

Macware Releases MacTuneUp 3.6 for Snow Leopard

Published on 11/04/09

Macware today announced MacTuneUp 3.6, a free update to the leading Mac disk utility software. MacTuneUp quickly discovers and fixes problems, restores hard disk space, creates bootable disk backups, and maximizes Internet and network connections to squeeze the best performance from your Mac. Easily prevent system instability and speed up your Mac with a few simple steps. Snow Leopard users can update by downloading the updater from the Macware support center.

Omaha, NE - Macware, a leading Mac software publisher, announced today version 3.6 of MacTuneUp is now available as a free update to users of the leading Mac disk utility software (based on The NPD Group). The new version is only available if you are running Mac OS X 10.4 or later, and current users can update MacTuneUp by selecting "Update..." in the MacTuneUp menu. Snow Leopard users can update by downloading the updater from the Macware support center.

Easily prevent system instability and speed up your Mac with a few simple steps. MacTuneUp quickly discovers and fixes problems, restores hard disk space, creates bootable disk backups, and maximizes Internet and network connections to squeeze the best performance from your Mac.

The new update includes:

- * Mac OS X 10.6 Snow Leopard support
- * Improved stability on PPC Macs
- * Increased application performance on Intel Macs
- * Improved disk cloning process
- * Resolves an issue when displaying certain Unix manuals
- * Resolves an issue when canceling a deletion or a backup process
- * Many minor improvements and resolved issues from previous versions

MacTuneUp is now available in Apple retail stores, Office Depot, OfficeMax, Best Buy, Staples, Fry's Electronics, Microcenter and other Mac software retailers, or online. More information is available on the Macware website.
