

SweetP Productions, Inc. releases SessionRestore 2.0 for macOS 10.15

Published on 02/24/20

Wilmington based SweetP Productions today announces SessionRestore 2.0, a major update to their advanced Safari tab management Extension. With SessionRestore, start with a fresh session by archiving your current browsing session to restore at a convenient date. Easily store any number of sessions with a quick button press. You can name sessions, and even provide custom notes and more. iCloud support is included for convenient sync between your various Macs.

Wilmington, Delaware - SweetP Productions, Inc. popular Safari advanced tab management extension has been updated with iCloud support for Mac to Mac syncing. Are you the kind of person who keeps numerous Safari tabs open, with the intent of reading them later? SessionRestore is here to help. Save your browsing session, close all windows then start with a fresh session. It's super easy to restore a session when ever you need it.

Easily store any number of sessions with a quick button press. You can name sessions, and provide custom notes - so you don't forget why you saved it in the first place! It's possible to remove unneeded tabs or windows from saved sessions. You may also want to combine sessions. This is easy in SessionRestore's powerful dedicated session editor.

Visually identify sessions by screenshot. Each session includes a handy screenshot which quicklook enabled for an quickly recognising important sessions. You backup your computer often, (well.. you should be) and now you can easily do the same with your browser tabs using SessionRestore. Who needs clumsy bookmarks - Go one step further, and save groups of tabs for instant retrieval anytime.

Features:

- * Fully configurable Autosave
- * iCloud support
- * Safari browsing session save and restore
- * Full session editing
- * Session metadata search (name/urls/notes)
- * Session screenshots for easy identification
- * Lightweight and Quick native Safari App Extension
- * Minimal Intuitive UI
- * Basic Safari Technology support

Built with the latest technologies, and integrated right in to Safari as an Extension, SessionRestore can help streamline how you manage and recall important websites.

System Requirements:

- * Compatible with macOS 10.14.4 and Safari 12.1
- * macOS 10.15 recommended for full iCloud support
