

## MacAppware Releases MacOptimizer 4.2

Published on 04/27/20

California based MacAppware today announces MacOptimizer 4.2, a new upgrade to its speedy disk utility application for Mac OS X. MacOptimizer can quickly help you clean, repair and organize your Mac. Speed up your Mac, fix common problems on your computer, and organize your Mac desktop using this fast and efficient disk utility application. Version 4.x boasts a bevy of new features to analyze and boost memory, speed up Internet browsing, monitor CPU and battery usage, and more.

San Francisco, California - MacAppware, a division of 128bit Technologies, announced today a new upgrade to its speedy disk utility application for Mac. MacOptimizer 4.2 is now available and boasts a bevy of new features to optimize and clean your hard drive, maximize battery life, free memory, organize your Desktop, and more. The main features of MacOptimizer 4.2 include:

- \* Free Cache - Clear your system of temporary files causing poor performance and stability, clear browser caches (Safari, Chrome, Firefox), and clean your font caches if you experience text problems (cleans system, Adobe and Microsoft font caches).
- \* Optimization - Optimize and repair your Mac so your OS and applications run faster, analyze and quit memory hogs, monitor CPU usage, maximize the life of your laptop battery, cleanup files on your Mac, and manage apps that start up automatically when you boot your Mac.
- \* Maintenance - Run system maintenance tasks to keep your Mac running smoothly.
- \* System Tweaks - Get easy access to hidden OS X settings and other useful tweaks that make it easier to work on your Mac. Categorized by General, System Finder, Dock, Safari, Interface and Other.
- \* Language Buster - Remove unnecessary language files to recover space on your Mac.
- \* Desktop Genie - Clean up your Desktop to speed up your Mac.

### More Details On MacOptimizer:
