

TheMacBundles Releases November Bundle - All Titles Work With OS X 10.6

Published on 11/04/09

TheMacBundles today announced the release of its November Bundle. TheMacBundles provides users with the best software bargains on the platform while also providing developers with an exceptionally high percentage of the revenue produced from the sale of their software. The November bundle contains 12 outstanding and diverse titles and will be available for 4 weeks. All titles in the November bundle work with OS X 10.6.

Berkeley, CA - MacEase Software today announced the release of TheMacBundles' November bundle. TheMacBundles' new marketing model brings unprecedented value to consumers while also returning to developers an exceptionally high percentage of the revenue produced by the sale of their software.

TheMacBundles has received widespread praise from journalists, Mac users, and software developers for its unique marketing model. Unlike traditional bundles, TheMacBundles:

- * Uses a cooperative marketing model
- * Eliminates the middlemen, which results in a better value for consumers and more revenue being provided to the developers that created the software
- * Includes only the latest version of the titles that are included in a bundle
- * Includes no "filler" programs - all titles in a bundle are premium quality software
- * Provides only titles which include the same level of support and the same reduced price for upgrades that apply to users who paid the full retail price for the software
- * Will be offering new bundles on a regular basis, thus providing an unprecedented selection of high quality software at unprecedented low prices

The November bundle includes 12 great titles - including award-winning titles - and is priced at only \$49.95 (USD). This represents a savings of over 85%! Additionally, users that purchase a Weekly Special title and the bundle receive a \$5 discount off of the bundle, resulting in a cost of only \$44.95 (USD).

The November bundle will be available for 28 days and includes 3 bonus titles. Purchasers of the bundle always get a 30-day money back satisfaction guarantee.

The 12 programs included in this bundle are:

- * iPhoto Library Manager - adds an additional level of control over iPhoto collections, can create multiple iPhoto libraries, and more.
- * MyStuff - is designed to be used every day to keep track of not only what users own, but also all the information they collect about what they own.
- * MyTunesRSS - is a private music and video server which lets users access their multimedia collection through a web interface in any browser. Users can create RSS feeds, download playlists, complete albums, and single tracks, or even play music directly in the browser in a convenient player.
- * PDFClerk Pro - is a powerful PDF manipulation program. Join PDF documents together, split even and odd pages, add/delete pages, rotate pages, add text, add graphics, and more.
- * Simon - is the essential site monitoring tool for Mac OS X. It checks servers for changes or failures, and notifies users via e-mail, sound, speech, Twitter, or other means. Many additional features are included.

- * Spyder - the only MySpace social network browser exclusively developed for Mac OS X. An intuitive user interface allows users to control powerful features effortlessly.
- * WebPrint Plus - allows users to easily and quickly save or print snippets of any size from any program, the Internet, and the Clipboard. Works via a uniquely flexible interface and system-wide shortcuts. Many more features are included.
- * Yum - is the ultimate recipe and cookbook manager. Add favorite recipes, organize them into categories, assign them ratings, print them with custom layouts, create shopping lists from the ingredients, and many more features.
- * Yummy FTP - is the fastest and most powerful Mac FTP / SFTP client available, with features such as directory synchronization, scheduling, remote editing with per-file editor support, auto-uploads via FTP Watcher, and more.
- * A-Dock X - brings a secondary Dock to users' screens. It's highly customizable and offers some unique features like skinning, 10-level deep folder browsing, and much more.
- * BlogAssist - is a handy tool to help weblog and website editing by making HTML markup easier. It comes with several useful operations, including web and e-mail links, bold/italics/strikethrough/etc, LiveJournal tags, and more.
- * FolderGlance - is a small plugin for the Finder. It allows users to control-click or right-click on folders to see and open their contents, as well as examine the contents of sub-folders down an unlimited number of levels, and much more.

Existing Mac users can purchase this bundle to enhance their and/or a family member's current setup and to get a great gift for someone. First-time computer users and people switching from a PC can use this bundle to get their Macs equipped for a wide range of tasks at a bargain-basement price!

Additionally, the highly rated utility MainMenu is being offered by TheMacBundles for one week for only \$10.95 (USD) - this represents a savings of 45%!
