

Output Factory for InDesign at 50% off on BitsDuJour until May 21

Published on 05/20/20

Zevrix Solutions announces that Output Factory for Adobe InDesign is available at 50% off on the software discount website BitsDuJour until May 21 only. Output Factory automates printing, exporting and preflighting from InDesign. The app offers batch output, export as single pages, variable file names, layer versioning, custom scripts integration, FTP delivery, and more. The software is designed to automate and simplify workflows of printers, prepress bureaus, ad agencies and publishing houses.

Toronto (ON), Canada - Zevrix Solutions announces that Output Factory for Adobe InDesign is available at 50% off on the software discount website BitsDuJour until May 21 only. Output Factory lets printers, ad agencies and publishing houses worldwide automate and simplify their printing and exporting workflows and eliminate repetitive tasks. The offer lets users save \$85 on each copy of the software.

"Output Factory has been the single biggest time-saver I've encountered in ten years of print production," says Mike Agate, Head of Production of Which?, Europe's largest consumer rights organization. "Easily saves hours a week, producing bullet-proof documents over and over... With the reduction in head count and efficiency savings, it must have paid for itself 500 times over."

With Output Factory, users only need to queue the desired InDesign files and select pre-defined output options. The software will then save multiple files to PDF or other formats with just a click of a button. Output Factory can also assign complex variable file names, output layer combinations, preflight documents before output, and export to multiple formats at once. Output Factory supports printing, PDF, PostScript, EPS, TIFF, EPUB and other formats. The app offers the following key features:

- * Batch printing and exporting of InDesign files
- * Export as single pages
- * Output to several formats with one click
- * Layer versioning: output layer combinations as single files
- * Variable output file names based on file contents, page numbering, date and other data
- * Run custom scripts
- * Preflight InDesign and PDF documents
- * Send output files to FTP and other servers

Pricing and Availability:

Output Factory can be purchased from BitsDuJour at 50% off for \$84.97 until May 21 only. Trial is also available for download. Output Factory requires macOS 10.8-10.15 and InDesign CS5-2020.
