

## Mini-Compo Weaves Your Music Like a DJ

Published on 06/18/20

Independent developer, Tomoyoshi Natsui today introduces Mini-Compo 1.2, a music listening app for macOS. With Mini-Compo, users can listen to the main portion of a song track, one after another. Mini-Compo has a special feature to display the sensitive audio level meter for each 10 frequency segments. How much to unleash the power of the music depends on you.

Tokyo, Japan - Indie developer, Tomoyoshi Natsui today is proud to announce the release of Mini-Compo 1.2, a music listening app developed for macOS. Are you making the best of your music files? Using Mini-Compo, you can listen to the main portion of a song track, one after another.

Its usage is up to you. At first, let's create a playlist. You can add the music from your music file (.mp3 or .m4a) to the playlist. This application plays a music from the "Start Position," and it plays music for the "Playback Duration." For example, if you made a setup playback 30 seconds respectively, you can listen to 100 musics in 50 minutes of commuting time. How much to unleash the power of the music depends on you. Your favorite music may remind you the thought which only you felt. Now, let's recover you-likeness.

After installation of this application, it has some restrictions as below. If you want to unlock it, please tap 'Unlock' at Playlist view:

1. You can create and edit only one playlist
2. You can register only 5 musics to the playlist

What's New in Version 1.2:

\* Fixed bug about "Audio Level Visualizer (0 segment)" at setting view.

Device Requirements:

- \* macOS 10.15 or later
- \* 8.5 MB

Pricing and Availability:

Mini-Compo 1.2 is free and is available worldwide exclusively through the App Store in the Music category. Convenient in-app purchases are available.
