

Teleconferencing? Upgrade Your Webcam With Filters and FX - macOS

Published on 09/14/20

Calgary based developer, Stonelight Pictures today introduces Webcam Effects Live 1.0.5, a new tool for video conferencing that improves the image of webcams in macOS 10.15. Webcam Effects Live is designed to enhance webcam video, and help get the best possible image when teleconferencing, streaming live, or recording video. Webcam Effects Live works with any 3rd party webcam or video source that is supported by the macOS system, and works with any built-in FaceTime HD camera.

Calgary, Canada - Stonelight Pictures today is proud to announce the release of Webcam Effects Live, its new video tool to enhance the video coming from webcams while teleconferencing, streaming live, or recording video. Intuitive controls allow adjustment of the look and feel of the video stream. 65 professional looks, each can be customized and saved in a filter library. Zoom, pan, and tilt with any webcam. Webcam Effects Live creates a virtual camera with an image adjusted video stream to send video to 3rd party apps.

Filter adjustment ranges from subtle to extreme, allowing for maximum control of the webcam image. Webcam Effects Live works with any 3rd party webcam or video source that is supported by the macOS system, and works with any built-in FaceTime HD camera. Webcam Effects Live is available from Stonelight Pictures today.
