

Output Factory for Adobe InDesign Now Supports macOS Big Sur

Published on 10/13/20

Zevrix Solutions announces Output Factory 2.4.36, a compatibility update to company's output automation solution for Adobe InDesign. Output Factory solves the problem of time-consuming InDesign production workflows through automation of printing, exporting, preflighting and other repetitive tasks. The app offers batch processing, layer versioning, variable file names, FTP uploads, custom scripts and much more. The new version makes Output Factory compatible with the forthcoming macOS 11 Big Sur.

Toronto (ON), Canada - Zevrix Solutions today announces the release of Output Factory 2.4.36, a feature update to company's output automation plug-in for Adobe InDesign. Awarded 5 stars by InDesign Magazine, Output Factory automates and simplifies workflows of publishers, printers, prepress houses, and ad agencies worldwide. The software helps users eliminate repetitive tasks and costly errors through batch processing with time-saving output options.

The new version introduces support for the forthcoming macOS 11 Big Sur which is currently available as public beta and is scheduled for release by Apple later this fall. The update is offered free of charge to licensed users and maintains support for earlier system versions down to macOS 10.8.

"I want to say how valuable and useful Output Factory has been for our company," says Ed Saye, studio manager at Blue Sky Agency in Atlanta, Georgia. "The folks that use it are delighted to have a way to automate so much repetitive work in a consistent and organized way."

Output Factory lets InDesign users enjoy shorter work hours by offering streamlined stress-free workflows with pre-defined actions. The app supports printing as well as exporting to PDF, PostScript, EPS, Flash, IDML, EPUB and several image formats. It offers the following key features:

- * Batch output of InDesign files
- * Export every n pages as a single PDF file
- * Variable output file names
- * Insert InDesign document's text into file names
- * Run custom AppleScript and JavaScript scripts
- * Create PDF security presets
- * Output files to multiple formats with one click
- * Layer versioning: output layer combinations as single files
- * Eliminate errors with automatic preflight

Pricing and Availability:

Output Factory can be purchased from Zevrix website for \$169.95 USD (Lite version \$99.95), as well as from authorized resellers and Adobe Exchange. Trial is also available for download. The update is free for the users of Output Factory 2.x, and \$84.97 to upgrade from Output Factory 1.x and BatchOutput. Output Factory requires macOS 10.8-11.0 and Adobe InDesign CS5-2020.
