

Graphic Inspector Now Reports Image Print Size: Graphics Preflight Tool

Published on 01/11/21

Zevrix Solutions announces Graphic Inspector 2.5.2, a feature update to company's quality control solution for images and vector graphics files. Graphic Inspector can flag images and Illustrator files with specific attributes such as resolution, color, spot channels, bit depth, metadata, embedded fonts and more. The new version adds the ability to report the image print size based on file's resolution and pixel dimensions. Users can also preflight images by their width and height values.

Toronto (ON), Canada - Zevrix Solutions today announces the release of Graphic Inspector 2.5.2, a feature update to company's quality control solution for images and vector graphic files. The software solves the problem of checking entire folders of documents for potential problems according to specific workflow requirements. Graphic Inspector is the only tool on the Mac market that lets the graphics industry professionals inspect both raster images and Adobe Illustrator documents.

The new version adds the ability to report the image print size based on file's resolution and pixel dimensions. Users can also preflight images by their width and height values which appear in two separate columns and represented in system's measurement units. The update also adds a contextual menu that lets users scan the selected folder directly from the system tree panel.

"Graphic Inspector displays every bit of useful information about vector or raster graphic files and flags the ones that match rules you define," writes Jay Nelson in Layers magazine. "With its combination of price, utility, and thoughtful design, Graphic Inspector is a rare gem."

Graphic Inspector is designed to help users of any trade, whether it's prepress, print, web design, or digital photography. For example, users can quickly locate files whose color mode is RGB, format - TIFF, resolution is below 300 dpi, ICC profile is "US Web Coated" and so on. The app offers the following key features:

- * Check multiple images and Illustrator files for potential problems
- * Customizable checkup presets
- * Professional prepress checks: spot colors, fonts in vector files, image compression and more
- * Search image EXIF, IPTC and GPS metadata
- * Common checks such as resolution, color mode, ICC profile

Pricing and Availability:

Graphic Inspector can be purchased from the Zevrix web site for \$19.95 (USD), as well as from authorized resellers. Trial is also available for download. The update is free for users of version 2 (\$10 to upgrade from version 1). Graphic Inspector requires macOS 10.9-11.0 (Big Sur).
