

LinkOptimizer 6 for Adobe InDesign Is Released for Public Beta Testing

Published on 02/03/21

Zevrix Solutions announces the public beta release of LinkOptimizer 6, a major upgrade to company's workflow automation solution for Adobe InDesign. LinkOptimizer saves users hours of manual processing through automatic image conversion and InDesign link size reduction. The new version introduces iCloud sync of settings presets, the ability to preserve PSD layer visibility applied in InDesign, relinking of duplicates a single image, macOS dark mode support, Photoshop version selection and more.

Toronto (ON), Canada - Zevrix Solutions Zevrix Solutions today announces the public beta release of LinkOptimizer 6, a major upgrade to company's image workflow automation solution for Adobe InDesign. LinkOptimizer liberates InDesign users from boring tedious tasks through automation of complex image manipulation processes that involve precise replacement of images after their editing in Photoshop. The new version introduces an array of new features that helps users automate additional tasks and simplify their production workflows:

- * Sync settings presets via iCloud across multiple Macs
- * Preserve layer visibility applied in InDesign when converting PSD to other formats
- * Relink duplicate links to a single image during color editing and format conversion operations
- * Extract and relink embedded links in InDesign files
- * Support for dark mode on macOS Mojave and later
- * Save settings presets automatically and sync via iCloud
- * Choose the desired Photoshop version for image processing
- * AppleScript support for some basic functions
- * Many performance and stability improvements

LinkOptimizer works automatically with Photoshop to perform essential image adjustments, convert image formats, and eliminate the excess image data of InDesign links, . For example, with just a click of a button users can:

- * Process dozens of InDesign files
- * Scale and crop images to match their dimensions in InDesign
- * Change their resolution to 300 dpi
- * Convert RGB images to a CMYK profile
- * Resave PNG files as TIFF
- * Run a Photoshop action on each image

Users can download LinkOptimizer 6 public beta from the Zevrix Solutions website. Beta testers who provide valuable feedback will get a 50% discount on their LinkOptimizer purchase (whether upgrade or a new license).

Pricing and Availability:

LinkOptimizer 6 public beta can be downloaded from Zevrix website. Qualified beta testers will receive a 50% discount on their LinkOptimizer purchase (detailed info is included with the download). The current version, LinkOptimizer 5, can be purchased for \$260 USD (Lite version: \$180). Trial is also available for download. LinkOptimizer requires macOS 10.9-11.0 (Big Sur) and Adobe InDesign / Photoshop CS6-CC 2021.
